Product Introduction

J-shape Suspension Clamp consists of plastic inserts, which clamps the optical cable without damaging. Suspension Clamp designed to suspend ADSS round optical fiber cable during the construction of transmission line.

A wide range of gripping capacities and mechanical resistance archived by wide product range, with different sizes of neoprene inserts. The clamp is made of hot-dip galvanized steel and weather resistant material.

J-shape clamps are designed to provide a suspension for 10 to 20mm aerial ADSS cables at intermediate poles on cable routes with angle $< 20^\circ$ on access networks (spans up to 100m).

These suspension clamps are suitable for coastal environments and are manufactured from high strength corrosion resistant aluminium alloy, incorporating neoprene bushes and stainless steel hardware. An optional failure link is built into the fitting.

The metal hook of ADSS Suspension Clamp allows installation on the pole by using stainless steel band and pigtail hook or brackets. The hook of ADSS clamp can be produced from stainless steel materials according to you request.

The suspension clamps can be directly secured to the poles using bolts or bandings. They can also be installed on hook bolts to provide some flexible suspension point and give extra protection to the cable against wind induced vibrations.

**TECHNICAL DATA:**

Model	SC50
Cable Size (mm ²)	16-50 mm ²
Material of Body	Galvanized steel & Weather resistant material plastic

PACKAGE:

FAQ:

Q1: Are you a trading company or factory?

A2: We are the factory, and we are the supplier of 35% company in this field.

Q2: Are you able to customize the product for me?

A2: Yes, we owns the professional R&D team and complete Injection molding machine.

Q3: What is the acceptable payment term?

A3: Credit Card, West Union, Paypal or T/T.

Q4: What is the package could be?

A4: We can make special design as your requirement.

Q5: What is your day capacity?

A5: 10000-20000pcs
