

Wedged Insulation Strain Clamp

NXJ series wedged insulation strain clamp is used for the terminal or the two sides of the strain section of the aerial insulated conductor with the nominal voltage of 10KV and below, to fix and tight the aerial insulated conductor in the strain insulator.

Product Introduction

NXJ series wedged insulation strain clamp is used for the terminal or the two sides of the strain section of the aerial insulated conductor with the nominal voltage of 10KV and below, to fix and tight the aerial insulated conductor in the strain insulator.

Wedge structure makes the grip strength proportional to the tension of the wire, with the characteristics of tightness, reliable operation, maintenance free.

The clamp shell is made of aluminum alloy with high strength and oxidation resistance and without hysteresis and eddy current, it is energy-saving fittings.

The shell with C type open design and easy put for the inside wedge and wires, it is convenient for the installation. The inside wedge is made of material with weather resistance and insulation reinforced engineering plastic, so it won't be broken down and flash over when holding 1 minute under an alternating voltage of 45KV.

TECHNICAL DATA:

Type	Cable Size (mm ²)		Cable Diameter (mm)		Grip Strength (KN)	Breaking Load (KN)

FAQ:

Q1: Are you a trading company or factory?

A2: We are the factory, and we are the supplier of 35% company in this field.

Q2: Are you able to customize the product for me?

A2: Yes, we owns the professional R&D team and complete Injection molding machine.

Q3: What is the acceptable payment term?

A3: Credit Card, West Union, Paypal or T/T.

Q4: What is the package could be?

A4: We can make special design as your requirement.

Q5: What is your day capacity?

A5: 10000-20000pcs
