### **Eps Block Molding Machine**

Ningbo PinSheng Machinery Manufacturer ("PINGSHENG" in short) was established in 2010. With professional R&D PINSHENG team, Machinery has become one of largest and outstanding manufacturer of Pinsheng® EPS Block Molding Machine, EPS Mould, EPP machine, ETPU machine and other related machines. We supply the whole range of EPS Block Molding Machine which are necessary for

## Product Description

Our organization puts emphasis to the administration, the introduction of talented personnel, and also the construction of team building, making an attempt hard to enhance the standard and liability consciousness of workers members. Our business successfully attained IS9001 Certification and European CE Certification of High Quality Low Price Eps Block Molding Machine, Initial enterprise, we understand each other. Additional enterprise, the trust is getting there. Our firm usually at your service anytime.

Pinsheng® High Quality Low Price Eps Block Molding Machine, We care about every steps of our services, from factory selection, product development & design, price negotiation, inspection, shipping to aftermarket. We have implemented a strict and complete quality control system, which ensures that each product can meet quality requirements of customers. Besides, all of our products have been strictly inspected before shipment. Your Success, Our Glory: Our aim is to help customers realize their goals. We are making great efforts to achieve this win-win situation and sincerely welcome you to join us.

Our Pinsheng® PSBM200-800VC/AC EPS Block Molding Machine is a full automatic equipment to produce EPS block, which is efficient and has low energy consumption.

Model: PSBM200-800VC/AC Brand: PINSHENG

### **Product Parameter (Specification)**

Our Pinsheng® EPS Block Molding Machine provides all machine process, including filling, expanding, sieving, de-lumping and conveying work automatically.

1.Flexible	The size of EPS Block Molding Machine can be adjustable . Both in length or
customized	width of machine by rotation code to control screw cylinder.By setting the
size	block mold size using the touch screen, the machine will adjust the mould size

Ningbo Pinsheng Machinery Co., Itd.

<ul> <li>and steel plate which make high strength to keep more safety of the machin All block mold frames have heat-treatment to release welding stress, so that the frames would not deformed.</li> <li>After heating treatment, all mold frames are processed by sand blasting treatment to keep the rust away, then under coat and finishing coat are great improved anticorrosion performance and long life; Adopts three Germany gauges and safety valve for multi-safety protection. The machine will be tested by water pressure and steam(many steps), ensure the machine more safety and stable.</li> <li>3.Steam system</li> </ul>

# **Product Feature And Application**

EPS(EXPANDABLE POLYSTYRENE) is commonly used for fruit,vetatables and electrical,insulation panels for building.With the good quality,it can be expand 40 times the volume of the original polystyrene beads.

## **Deliver, Shipping And Serving**

### FAQ

1.Where is your factory located?

We have 2 production plant, one plant locates in Hangzhou which professionally producing EPS/EPP/ETPU machine. Another factory locates in Jiangsu Provide which producing EPS/EPP/ETPU mould. Both two factories are pretty close to the Shanghai port for easiest transportation.

2.Do you have detailed and professional installation manual?We will provide very detailed installation manuals and videos, and the service until you are satisfied

3. Are you a trading company or a manufacturer? We are manufacturer.

4.Q:How long is your delivery time of Eps Block Molding Machine? Normally delivery time is 30~45 days.

5.Q:How many years have your company made this kind of equipment? More than 10 years.

6.Q:Can I only buy some spare parts of Eps Block Molding Machine from you? Yes, we also provide all kinds of spare parts that relatives to our machine.

7.How do you pack the equipment? We will strengthen and protect the equipment to ensure that they will not be damaged during transportation.

8.Q:Can you send your staff to install the equipment for us? Under normal conditions, it is possible. Now it is an epidemic situation. We will try our best to assist in case we cannot send technician in time. We will also conduct video connections with guests to teach them to install them in place.

9.Q:Can you can design the equipment according to our size? Yes, it is acceptable

10.Q:How many production lines in your factory? We have total 10 production line.
