	2.OEM and ODM order are acceptable.
	3.Excellent Finish, good function, nice service, on-time delivery.
	4.Our strict online inspection and good quality control ability are always reliable.

**Product Feature**

Extension Hinge with Spring allows the extension panel to swing completely out of the way underneath the table surface. Spring loaded hinge and leaf support mechanism converts square table tops to round tops by adding drop down leaves.

Spring loaded flap top hinges lock open to support a table leaf. Release the spring, and the flange folds, letting the leaf fold under the table, where it is held in place by a second set of springs.You need no other support than these hinges when you want to have a table leaf pop up in the raised position. These are the hinges used in restaurants when you see a waiter flip up a leaf to turn a square table into a round one for extra space. Expecting your inquiry about the latest price and details.
