

Ammonia Automatic Dosing Pump

Ammonia Automatic Dosing Pump, which are reciprocating positive displacement pumps, provide the greatest possible metering accuracy. They set the standard for safety, reliability and efficiency, especially when it comes to pumping supercritical fluids.

1.Product Introduction

Every Ammonia Automatic Dosing Pump made by dongkai is designed with particular strengths: Whether your needs include energy-efficiency, low maintenance costs, or an extremely long service life for diaphragms. Or perhaps you are looking for a metering pump model that can handle supercritical fluids and liquid gas, or one that meets the highest requirements and demands of the Ammonia .

2.Product Parameter (Specification)

Capacity: from 5.5 to 1200 L/h

Max pressure: 20 bar

Standard: PVC pump casing, 380v, 50hz motor

Optional standard: SS304, 316, PTFE Pump casing

420V, 220V, 110V Voltage

EX motor, Variable Frequency Motor

3.Product Feature And Application

Accurate & Sophisticated Dosing Metering

Fixed & Variable Output Choice

www.cndkby.com

Leak Proof in Nature
Compact, Sturdy Design & Long Lasting
Low Power Consumption
High Efficiency
Noiseless Running
Virtually Maintenance Free
In built Versatility to Suit any kind of Liquids
Abrasion Resistant and Corrosion Resistant
Value for Money and many more

4.Deliver,Shipping And Serving

5.FAQ

Q1: What's your business range?

A: We manufacture Water quality analysis instruments and provide dosing pump, diaphragm pump, water pump, pressure instrument, flow meter, level meter and dosing system.

Q2: May I visit your factory?

A: Of course, our factory is located in Zhejiang, welcome your arrival.

Q4: Why choose us?

1. We have more than 10 years of industry experience in water treatment.
2. High quality products and competitive price.
3. We have professional business personnel and engineers to provide you with type selection assistance and technical support.
