Product Detail

Eatripway® **aluminium roof rack car roof cross bars**

Bring You Security & Durability- Eatripway® roof rack cross bars is upgraded with locking feature for security and made from high grade aluminum, base feet are made of high quality plastic. Aluminum is on average 30% lighter than steel. Our roof rack

crossbars can withstand greater stresses than the best all-steel roof rack at 1/3rd less the weight.

Strong Load-bearing Capacity- This Crossbars Roof Rack can hold luggage up to 150 pounds, and can install bicycle racks, roof boxes, roof racks, roof bags and other self-driving traveling equipment. **Less Wind Noise Design:** streamlined design makes it effective in reducing wind resistance and noise.

Easy Installation- According to the buyer's opinion, we printed the instruction manual for the product and added it to the package. Only need to use a screwdriver to install, no need to drill.
