

24 Colors Solid Watercolor

As a professional 24 Colors Solid Watercolor manufacture, you can rest assured to buy 24 Colors Solid Watercolor from our factory and we will offer you the best after-sale service and timely delivery.

1.Product Introduction

As a professional high quality 24 Colors Solid Watercolor manufacture, our product has been well accepted more than 20 countries, like USA, Canada, UK, Australia etc countries. We have achieved remarkable success in this domain as a result of our focused approach, timely delivery, and ethical company philosophy. 24 Colors Solid Watercolor has a variety of characteristics, with colorful choices, to create a delicate life. Concentrated pigment, soluble in water, durable: light fast and durable, not easy to fade, high purity color changing powder, fine grinding, water soluble, easy to dip. Independent small piece, easy to use: each color is an independent small box, easy to carry out sketching, small size, durable and not waste. Bright color, high saturation: the painting is smooth and easy to color, the color is full and delicate, the color is positive, the color difference between dry and wet is small, and the transition between dizzy and dyeing is natural. Gorgeous pearl color, can be multi-color collocation: bright color, high selection, fresh painting sense, add another effect for the painting. Really harmless pigment: children use comfortable, parents buy at ease, we use at ease. When using, dip the wet tip of the pen into the pigment block, and use it directly. It can also be used with other works, such as coloring watercolor painting, and then wait for dry. Superimposed with a layer of pearlescent watercolor, there is a flash effect, to 2D work to bring 3D fun. The fast pace of city life makes people seldom have the chance to stop and enjoy the beautiful scenery along the way and record their life. Let's calm down and enjoy the beautiful sunset. May everyone paint the world in their own color.

3.Product Feature And Application

Watercolors are resolvable. These dry looking pigments need to be moistened with water to get their color. In general, use crayons or Chinese painting brush, dip in with normal tap water can take paint for painting, but note that don't use too much water immersion pigments, lest paint cracking shatter, on the other hand, we must keep the light color pigment purity, a brush to clean the dip again, otherwise, it's hard to get pure bright color. After the use of solid paint, it is best to use a clean brush to clean the mixed color on the surface, even if it may lose some paint, but if not clean, it will bring a lot of trouble to the next use.

Clean paint to dry as much as possible, to avoid cracking or mildew, after all, there are a lot of bacteria love in the paint organic ingredients.
