

HUIZHOU NEWDAY TECHNOLOGY CO.,LTD

PICKLEBALL PADDLE BROCHURE

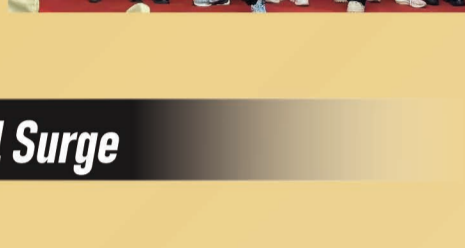

ABOUT US

Established in 2017, with over 8 years of manufacturing and sales expertise, our company has been a key player in the pickleball industry for the past 4 years.

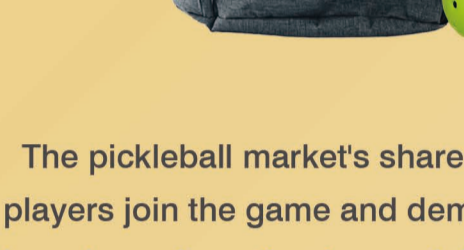

We possess a deep understanding of pickleball paddle production techniques, structural design, and adherence to industry product standards.

With a daily production capacity exceeding ten thousand units, we are fully equipped to meet the demands of large-scale orders from our clients.

Our products consistently meet USAPA standards, ensuring that our customers have no post-purchase worries, fostering long-term business relationships built on trust and reliability.

We invite you to join us in shaping the future of sports together, as trusted partners committed to excellence. Your success is our priority, and we look forward to embarking on this journey with you.

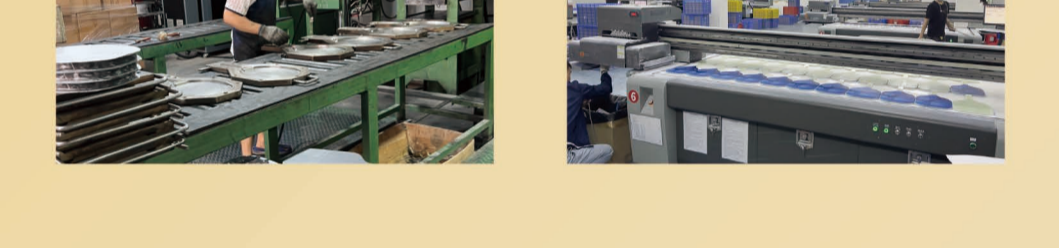

Growing Pickleball Surge

The pickleball market's share and growth are surging, as more players join the game and demand for equipment rises. Major brands are investing in specialized gear, expanding the market's offerings.

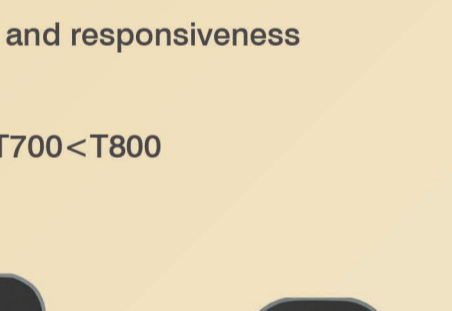

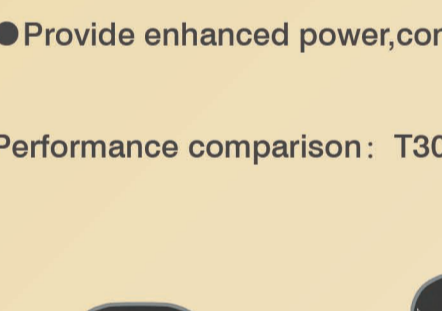

With a global rise in clubs, leagues, and tournaments, the community is vibrant and expanding rapidly. This growth trajectory indicates a promising future for the pickleball market, poised to continue its upward trend.

THERMOFORMED & COLD-PRESS PADDLE

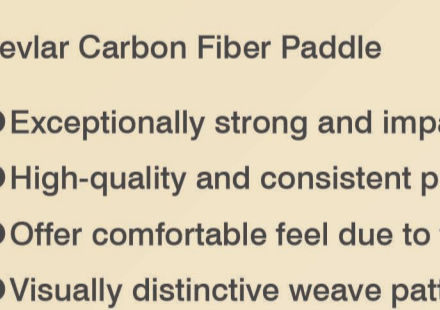

The hot-pressed pickleball paddle, a product we specialize in, stands out as one of the most advantageous choices for professional Pickleball players. Its intricate manufacturing process involves the use of molds and high-quality carbon fiber materials.

However, its downside lies in the complexity of the production process, involving multiple stages and a longer production time, which contributes to its relatively higher price point.

The cold-pressed pickleball paddle, known for its high cost-effectiveness, relatively simple manufacturing process, and short production cycle, has gained popularity in the emerging market of Pickleball.

With a daily production capacity exceeding 10,000 paddles and a monthly output surpassing 300,000 paddles, we are capable of fulfilling large custom orders and meeting the fast delivery needs of our customers.

T300 T700 Series Pickleball Paddle

T300/T700/T800 Carbon Fiber Paddle

- High strength and stiffness
Lightweight, quick reactions and effortless swings
Good performance in vibration dampening
Offer a good balance between lightweight and durability
Provide enhanced power, control and responsiveness

Performance comparison: T300<T700<T800

Kevlar Pickleball Paddle

Kevlar Carbon Fiber Paddle

- Exceptionally strong and impact-resistant
High-quality and consistent performance
Offer comfortable feel due to the flexibility
Visually distinctive weave pattern
maximum control and power suitable for all skill levels
Incorporate the latest advancements in paddle technology

Color options: red, black, yellow, blue

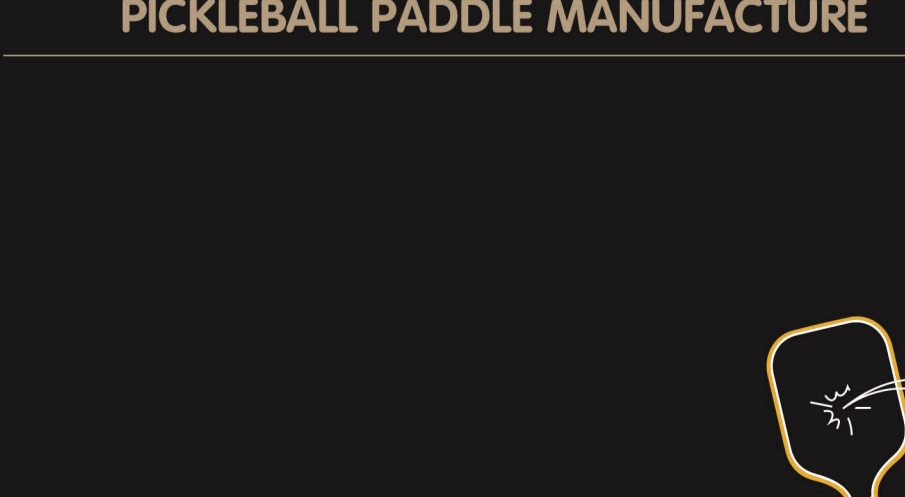

3K/12K/18K&Flax Fiber Pickleball Paddle

3K/12K/18K Carbon Fiber Paddle

- Visually distinctive weave appearance
High stiffness and strength
Provide good strength and durability
Withstand higher levels of impact and stress during gameplay
Offer excellent resistance to impact and wear

Performance comparison: 3K<12K<18K
