Choose us and we will bring you professional products and excellent service

Dozer track master link assy with track shoes and groups function to allow crawler-type heavy machinery to move efficiently. These track chains and groups are made up of flexible links that are connected together by fittings called pins and bushings. There are two types of track chains that exist for heavy machinery: dry chains and lubricated chains. It is made by forging, machining, heat treatment, assembly, painting etc.

The quality and working life depends on the quality of raw steels, the hardness of rail surface, the depth of hardness layer, the quality of seal group etc.

Product Parameter (Specification)	
Model Name	Dozer track master link assy with track shoes
Part number	D7G
Material	40Mn2
Color	Black or Yellow
Surface Hardness	HRC48-55
Application	Crawler Excavator
Warranty time	1000 hour
Technique	Forging
Usage	Crawler track chain machine
Application	Excavator parts

### Product Details
