

## 3S 3A PCM For 18650 Battery Management System Lithium ion BMS

You are welcomed to come to our factory to buy the latest selling, low price, and high-quality 3S 3A PCM For 18650 Battery Management System Lithium ion BMS. We look forward to cooperating with you. LWS® are high-tech enterprise integrating the research and development, production, sales and client service of multi-series and power type lithium battery protection boards. Our 3S 3A PCM For 18650 Battery Management System Lithium ion BMS is new arrival.

### Product Introduction

LWS® 3S 3A PCM For 18650 Battery Management System Lithium ion BMS

has such basic functions : over-charge protection ,over-dicharge protection, over-current protection, short-circuit protection

### Product Parameter (Specification)

3S 3A PCM For 18650 Battery Management System Lithium ion BMS

### Product Feature and Application

Our LWS® 3S 3A PCM For 18650 Battery Management System Lithium ion is suitable for the following products:

LED lamp backup power supply, 12V electronics, solar street light battery pack, monitoring standby power, and other products.

### Product Details

3S 4S 4A 11.1V Lithium ion Battery Protection Board with charge management was build with high end electronic components (High End IC and MOSFET )

### Notes

- 1) Wire connection strictly according to the drawing, do not intentionally short circuit.
- 2) Before charged, need to connect the cables first.
- 3) When the group of battery is connected in series, ensure that the voltage of each

group of batteries voltage is the same. If not, fill each group of batteries separately before connecting them in series. In discharge tests, the group of cells with the fastest voltage drop is the differential cell.
