## Classic American Style 古典美式

American style, in a sense, is synonymous with colonial style. The United States is a country of immigrants. At the end of the 15th century, European countries and nationalities came to the American continent with a "gold dream", bringing the decoration, decoration style and furniture style of various regions to the American continent. After the independence war, the United States was founded. The United States is a free country with multi-cultural integration. The particularity of American culture has created the American people's admiration for the free and uninhibited way of life.

## Luxury American Style 轻奢美式

American style has both culture, aristocratic temperament, and is not lack of ease and emotional appeal, these elements are also catering to the nowadays  
The demand of consumers for the small bourgeoisie lifestyle is now more simple and natural for young people, so the new American style has become the time  
The most popular style, simple style with a little bit of light luxury, is another charming style.  
Elegant but not excessive decoration, abandon the flashy life inlaid with gold and silver, praise the design without showing off, is the inherent dignity,  
Low-key luxury, every detail is touching and warm.

## *New Chinese Style* 新中式

Il nuovo stile di architettura cinese è l'interpretazione moderna che i designer danno della cultura architettonica cinese tradizionale. Non è lussuoso e scultoreo, ma crea uno spazio vuoto che lascia le stalle orientali in armonia con la natura, con un fascino ardente, classico e raffinato, e con l'idea tradizionale di "uomo unico".
