

Fiberglass Extension Ladder

Model:jeclabber

Jecsany is China manufacturer & supplier who mainly produces Fiberglass Extension Ladder with many years of experience. Hope to build business relationship with you.

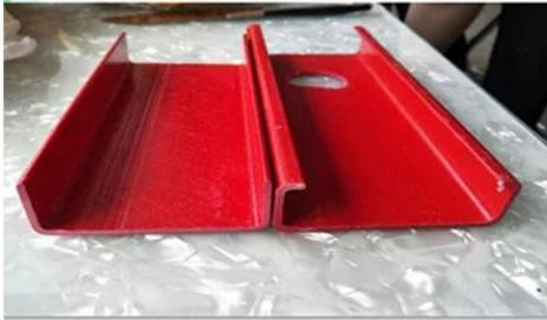

Product Introduction

Factory Fiberglass Extension Ladder Made in China with Low Price. Jecsany is a Fiberglass Extension Ladder manufacturer and supplier in China. Fiberglass Extension Ladders are designed to be used for overhead lines structures to allow climbing. It is made of two sliding sections. The ladders is portable and suitable for use in the construction operation and maintenance works. They are used mainly on round and lattice type steel poles and concrete poles. The fiberglass extension ladders comply with EN131 Standard.

Fiberglass Extension Ladder

Material Comprision

Advantage of our fiberglass material:

1. It contains imported continuous filament, which manufactured by Owens Corning.
2. The design of edges are curved. This design can reduce friction during the usage of ladder, to save labor.
3. The size of fiberglass frame is 30 x 85mm, more bigger than the common ladder in the market.
