

## Galvanized Pipe Clamp

Model:JEC-AB001

Pipe Clamp is a component in which one material embraces or encloses another material. Produced by high-quality steel, the surface is smooth, thick zinc layer, corrosion-resistant, long service life, safe and reliable. Products are widely used in many fields such as electric power, telecommunications, radio and television.

### Product Introduction

Description	Galvanized Pole Clamp for Pole Accessories
Application	Power Accessories on power transmission, power Distribution, power station, etc.
Material	Carbon Steel
Finish	Hot Dip Galvanized
Processing	Stamping-HDG-Assembling
