

## High Voltage Electrical Porcelain Long Rod Insulator

Model:EP1116

Jecsany is one of the famous China High Voltage Electrical Porcelain Long Rod Insulator manufacturers and suppliers. Porcelain Long Rod Insulators are used on substation & transmission Line. It helps to support and hand wire, insulation wires against tower.

### Product Introduction

High quality High Voltage Electrical Porcelain Long Rod Insulator made in China. Jecsany is a High Voltage Electrical Porcelain Long Rod Insulator manufacturer and supplier in China. EP1116 Porcelain insulators are insulators made of electrical ceramics. Electrical ceramics are baked from quartz, feldspar and clay. The surface of the porcelain piece of the porcelain insulator is usually covered with enamel to improve its mechanical strength, waterproof and infiltrate, and increase the surface smoothness. Among all kinds of insulators, porcelain insulators are the most commonly used.

### Product Parameter (Specification)

Color	Brown
Creepge distance	610mm
Tensile impulse withstand	210KN
Power frerquency withstand wet	65KV
Impulse withstand voltage	210KV
Tested to	IEC 60383,DIN 48006

### Product Feature And Application

Our advantages:

Products are produced by ourselves, which ensures good profit margin and flexibility.

Our products have passed Design Test and Quality Conformance Tests on ANSI Class, and meet standards such as IEC.

We have large market share home and abroad.

Exclusive and unique solution can be provided to our customers by our well-trained and professional engineers and staffs.
