

## Multifunction Stainless Manual Pallet Steel Banding Strapping Tool

Model:JST

Jecsany was set up formally in , as one of the professional China Multifunction Stainless Manual Pallet Steel Banding Strapping Tool manufacturers and China Multifunction Stainless Manual Pallet Steel Banding Strapping Tool factory, we are strong strength and complete management.

### Product Introduction

Hot sale quality Multifunction Stainless Manual Pallet Steel Banding Strapping Tool with Low Price made in China. Jecsany is a Multifunction Stainless Manual Pallet Steel Banding Strapping Tool manufacturer and supplier in China. Whether you are using banding with buckles, strapping with wing-seals, or a combination of the stainless steel clamping system, all can be used with strapping clamping tools. The Strapping band tools are unique to the stainless steel clamping system and allow for the installation of strong, durable stainless steel clamps, which will remain intact over years.

Stainless Steel Banding Tool is used for bundling cable, billboards, traffic signs, pipes, ect.

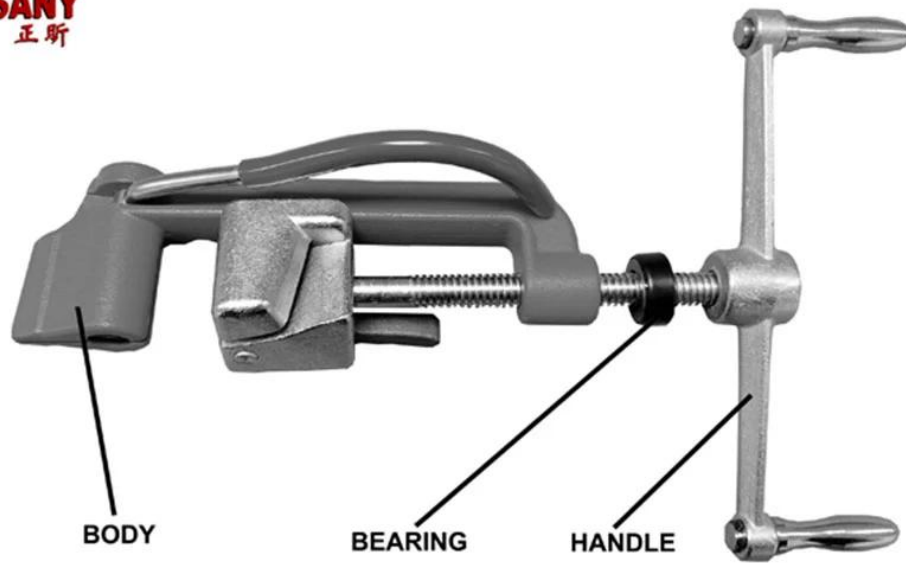

It is specially used for the stainless steel packing band, has the function of tightening and cutting off, it is used simply and conveniently.

### Specifications:

Item No.	Strapping Width	Type	Body
JST1434L	1/4" to 3/4"	Light Duty	Casting Body
JST3834H	3/8" to 3/4"	Heavy Duty	Forged Body
JST3454G	3/4" to 1-1/4"	Giant Type	Casting Body

### Features:

1. Forged tool with built-in cutter
2. Spring loaded gripper lever and friction-held cut off lever with grip improve ease-of-use.
3. Suitable for band, strapping and free end clamps.
4. Strapping banding tools can be widely used for municipal road signs.

**Advantage:**

- . Compact design is easy for transportation around the project site.
- . A built-in lever and cut-off tool is easy for clasping and separating.
- . Spring loaded gripper is easy for operation and tensioning.
- . The strapping tool with epoxy coating increases durability for reuse.
- . Weight: 2KG

**Choice:**

Stainless steel is an excellent choice when you bind two items together, such as mounting a metal sign on a telephone pole. This stainless steel is durable, resistant to corrosion and will remain strong even in the harshest conditions.

Having the stainless steel bands and brackets will not be enough to achieve a secure and tight bind, however, you need a correct strapping banding tool to get the proper installation.
