

Forming Fabric For Paper Machine Bottom Wire

FarEast (Xinhui) Paper-Making Fabric Co.,Ltd. is one of the largest polyester forming fabric for paper machine bottom wire manufacturer and supplier, located in Jiangmen City, China.

D-fabric® is founded in 1995, and we are specializing in the research and production of forming fabric and dryer fabric for almost 30 years. We can supply you the high and stable quality for the forming fabric and dryer fabric with the best price. Expecting to establish a

long-term cooperation relationship with you in China.

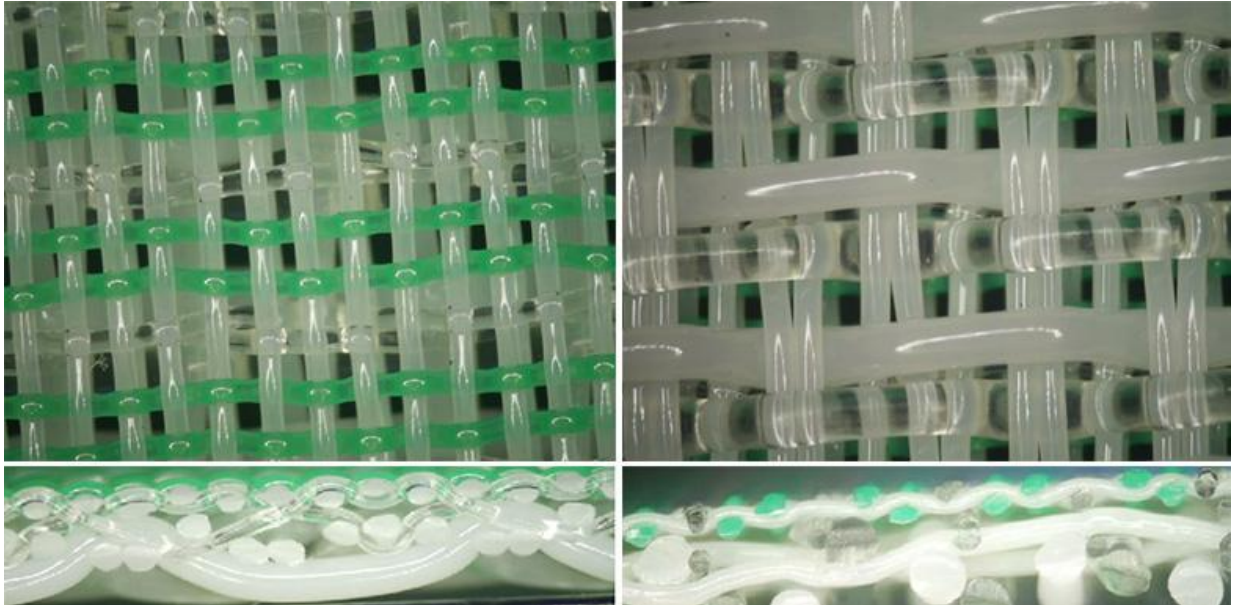

This forming fabric for paper machine bottom wire is made by high quality polyester & nylon that is 16 shaft triple SSB structure. It is widely used in Paper Industry. It is used for forming section and for high gram cultural paper making usually. The bottom of this forming fabric is double-warp locked structure, and it runs with high loading for vertical direction and wrinkle resistance for cross direction, simultaneously the diameter of weft filament on the bottom is big and the filament is long-span. The advantages of this forming wire are with long service life, good dewatering and good stability. It can be used for fourdrinier machine and the middle wire/bottom wire of multi-wire paper machine.

Product Parameter (Specification)

Model	Layer	Material
CXW4216-1SSB series	Triple SSB	Polyester&Nylon

Product Feature

There are SSB triple layers, 2.5 layers, 1.5 layers, single layer forming fabric used for forming section of paper machine. This forming fabric for paper machine bottom wire is triple SSB structure, and its structure and characteristics make it with long service life, good dewatering and good stability.

Product Application

This forming fabric for paper machine bottom wire is suitable to produce some cultural paper in high gram weight(80-130gsm);used for top wire(40-60gsm) and middle wire for partial test liner (40-60g/m²) and bottom wire for coated paper and test liner.

Product Details

The main characteristics of FarEast SSB triple forming fabric for paper machine bottom wire are with long service life, good dewatering and good dimensional stability. Its characteristics and double-warp locked structure effectively improve the paper quality. FarEast SSB forming fabric help many paper mills manufacture high quality paper and keep the stable quality.

Company Details

Our quality system has been assessed and meets the ISO9001:2008 quality standard by TUV, and we have obtained 15 related patents, including 6 international patents. Our product quality has been in the forefront amongst the industry of paper machine clothing, receiving numerous awards and honors.

D-fabric® has cutting-edge paper production and testing equipment that were imported from Germany, Sweden and Norway. All our paper-making fabrics are
