

Forming Wire for Paper Machine Forming Bottom Fabric

FarEast (Xinhui) Paper-Making Fabric Co.,Ltd. is one of the largest polyester forming wire for paper machine forming bottom fabric manufacturer and supplier, located in Jiangmen City, China.

D-fabric® is founded in 1995, and we are specializing in the research and production of forming fabric and dryer screen for almost 30 years. We can supply you the stable and high quality for the forming fabric and dryer screen with the best price. Looking forward to becoming

your long-term partner in China.

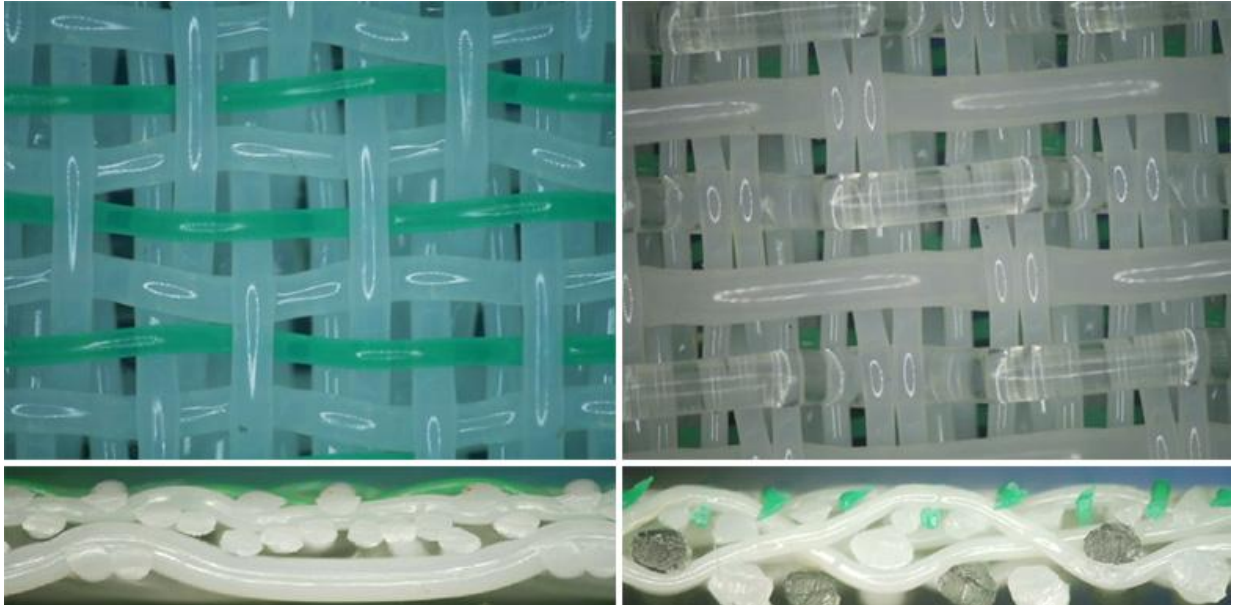

This forming wire for paper machine forming bottom fabric is made by high quality polyester & nylon that is 16 shaft 2.5 layers structure. It is widely used in Paper Industry. The supporting weft yarn in cross direction is used to increase the retention. It is woven by thicker polyester and nylon yarn in the bottom of mesh to increase the service life, simultaneously the bottom of this forming fabric is double-warp locked structure, and it runs with high loading for vertical direction and wrinkle resistance for cross direction. The weft yarn in the bottom is big and long-span that is greatly increase the service life. Its structure is stable and the retention of filler is high. It is with good dewatering and high wear resistance. It can be used for fourdrinier machine and the middle wire/bottom wire of multi-wire paper machine.

Product Parameter (Specification)

Model	Layer	Material
CXW4250F	Two and A Half Layer	Polyester&Nylon

Product Feature

There are SSB triple layers, 2.5 layers, 1.5 layers, single layer forming fabric used for forming section of paper machine. This forming wire for paper machine forming bottom fabric is 2.5 layers forming fabric structure, and its seaming design keeps the high retention of paper forming and increases the wear resistance.

Product Application

This forming wire for paper machine forming bottom fabric is suitable to produce fluting paper(60-170gsm),used for middle wire(40-80gsm) for test liner and bottom wire for coated paper and test liner.

Product Details

The main characteristics of FarEast forming wire for paper machine forming bottom fabric are with good dewatering,good structure stability,long service life and high wear resistance.Its characteristics and the best seaming structure promote the paper quality for paper mills.FarEast forming fabric help many paper mills manufacture excellent quality paper and keep the stable quality.

Company Details

Our quality system has been assessed and meets the ISO9001:2008 quality standard by TUV,and we have obtained 15 related patents,including 6 international patents. Our product quality has been in the forefront amongst the industry of paper machine clothing, receiving numerous awards and honors.

D-fabric® has cutting-edge paper production and testing equipment that were imported from Germany, Sweden and Norway.All our paper-making fabrics are

produced with the advanced production and testing equipment to ensure the best quality of paper-making fabric.

We have established a long term cooperative relationship with the global top paper-making enterprises, meantime some products are exported to Russia, Vietnam, Indonesia, Pakistan, India, Iran, Brazil and so on.

Approved quality management system ISO9001:2008 by TUV

Confirmed as the governing unit by the third council of the National Federation of Industry and Commerce Paper Industry Association
