China MEIJIA shockproof classic waterproof protective case is a portable black case with a plastic handle, which is able to provide a safety guarantee for the user to transport precision instruments and valued possessions in a safer way, so that the users could not be worried about that the instruments and possessions will be damaged during the transportation. The body of the case is elegant black, which meets the aesthetic needs of most users' requests. The classic waterproof protective case uses high-quality PP engineering plastics, makes the case substantial, and the performance of waterproof makes MEIJIA professional plastic classic waterproof protective case works well even in bad weather all year round. Those features meet people' s requests all over the world.

MEIJIA shockproof classic waterproof protective case Introduction
Model: MJ-5018/1450-16'

MEIJIA in China is a factory and exporter specializing in the production and export of tool boxes, fishing boxes and tool kits made of plastic (PP), aluminum and cloth. With dozens of technical engineers, technical backbones, and having new product research capabilities and market competitiveness, MEIJIA have extremely strong production technology strength. And have obtained the ISO9001, GS quality system certification. The shockproof classic waterproof protective case is one of the MEIJIA' s hot selling products.

The shockproof classic waterproof protective case is a solid case made of modified PP engineering plastics, which is hard to be broken. In recent years, shockproof classic waterproof protective cases have been widely used in military, police, photography, medical and other fields. And the materials of safety cases and protective cases in China, at present, are mainly ABS plastics and modified PP engineering plastics. However, lacking sufficient elasticity, being brittle and relatively hard on the senses, the protective performance of

ABS plastic is inferior to PP engineering plastics. PP engineering plastics improve the properties of flame retardancy, strength, impact resistance, toughness, etc., and are superior materials for the production of safety cases. Of course, the cost of PP material will be relatively high. Thus, considering the our customers' need of high-quality, we use the superior material of modified PP engineering plastics. Although the product itself does not have an absolute price advantage, its wear resistance, drop resistance, and low temperature resistance are accepted by more people.
