

Sample Order of Mechanical Part

You can rest assured to buy Sample Order of Mechanical Part from SJ factory and we will offer you the best after-sale service and timely delivery. With vast experience in manufacturing non-standard stainless steel part, SJ is focusing on fast prototype and mass production order. Our advanced inspection machines can assure all non-standard stainless steel parts in highest quality and deliver to our clients fastly and safely. For better understanding non-standard stainless steel part, we would like to give you an introduction of this part as below.

Product Description

High quality Sample Order of Mechanical Part made in China. SJ is a Sample Order of Mechanical Part manufacturer and supplier in China. The raw material was purchased from a reliable famous material factory and always tested by authority inspection agent. Our QC team is strictly executed full dimension inspection for this non-standard stainless steel part. We can provide Material Data Sheet, QC Inspection Report, ROHS Report of automotive aluminum part to our customers. Apart from manufacturing non-standard stainless steel parts, we also can provide surface treatment for the parts such as anodizing, oil painting, galvanizing, electroplating etc.

Product parameter (Specification) of Non-standard stainless steel part:

Material	SS304, SS306, SS316, AL2024, AL7075, AL6061, AL6063, C3600, C3771
Surface treatment	Anodized, Hard anodized, Oil painted, Galvanized, Nickel plating
Packaging	Neutral packing, blister and bubble plastic bag, or custom packaging

Lead time	7-10 days for sample orders, 15-25 days for mass production orders.
Payment terms	By T/T, By Paypal, By Western Union.
Processing machines	Lathe machine, Milling machine, CNC machining center, Grinder

Pictures of Our Workshops(Lathe, Auto-lathe, CNC machining center)

Strength of SJ to be a supplier of Non-standard stainless steel part:

1. Rich experience in machining metal parts with different material.
2. Material is authentic and tested by authorized third party.
3. Our sales team can Communicate with the clients very well.
4. Can response in 48 hours once get inquiry or feedback from the client.
5. Can complete the order fast and deliver the goods in time.

Q&A:

1.Q: What is gold plating?

A: Other than its aesthetic appearance, gold plating has many useful characteristics. The first being that it provides excellent corrosion and tarnish resistance. Second, gold plating is a great finish if conductivity is a major concern. One of the important characteristics of gold plating is that it has an extremely low contact resistance for electricity. Lastly, gold provides a great finish for solderability.

2.Q: If the client provide a sample to you, can you produce the same one as per this sample?

A: Yes, we can. First, we need do 3D output to this sample; Second, ask engineer to make a 2D and 3D file; Third, we will manufacture the same one to your sample. After these samples got the client's approval, we will do mass production.
