Stainless Steel 316 Machined Part

With decades of fast development, SJ has becoming one of a supplier of Stainless steel 316 machined part and a professional manufacturer of Stainless steel 316 machined part. We can do vacuum electroplating to the surface of Stainless steel 316 machined part. In the following, we will give you better understanding of this kind of part.

Product Description

Introduction of Stainless steel 316 machined part:

As a manufacturer of Stainless steel 316 machined part, SJ is focusing on fast prototype and mass production order. The raw material was purchased from a reliable material factory and always tested by inspection agent before mass production. Our QC team is strictly executed full dimension inspection for this stainless steel 316 machined part. We guarantee all of our products were in highest quality and deliver to our clients in shortest time. Furthermore, our after-sales service team will collect the feedback from the client and handle it within 48 hours.

Product parameter (Specification) of Stainless Steel 316 Machined Part:

Material	SS304, SS306, SS316, AL2024, AL7075, AL6061, AL6063, C3600, C3771
Surface treatment	Anodized, Hard anodized, Oil painted, Galvanized, Nickel plating
Packaging	Neutral packing, blister and bubble plastic bag, or custom packaging
Lead time	7-10 days for sample orders, 15-25 days for mass production orders.
Payment terms	T/T, By Paypal, By Western Union.

Strength of SJ to be a supplier of Stainless Steel 316 Machined Part:

1.Rich experience in machining metal parts with different material.
2.Material is authentic and tested by authorized third party.
3.Our sales team can Communicate with the clients very well.
4.Can response in 48 hours once get inquiry or feedback from the client.
5.Can complete the order fast and deliver the goods in time.

Q&A:

1.Q: Can you provide surface treatment for the metal parts?
A: Our factory can provide surface treatment of the metal parts such as anodization, hard anodization, electroplating, vacuum electroplating, sand blasting, powder painting, passivation, chromating.

2.Q: If the client provide a sample to you, can you produce the same one as per this sample?
A: Yes, we can. First, we need do 3D output to this sample;Second, ask engineer to make a 2D and 3D file; Third, we will make a sample. After samples got client's approval, we will do mass production.
