Thread	Metric Coarse, Metric Fine, UNC, UNF, BSW, BSF.
Sizes	M3-M60, 1/4 to 3 inches.
Packing	Bundle or Carton or Others

Product Feature

How do you fasten a Dowel Screws with Wood and Metric Thread Zinc Plated?

NEWSCREW Secure Dowel Screws - Squirt a bit of wood glue into the guide hole you just made. Insert a dowel screwdriver head in your cordless screwdriver. Keep turning the dowel screw until the final edge of the thread disappears into the wood. Let the glue set completely.

How do you use a double ended screw?

Just turn the pieces. Both ends of the screw will feed in at once. This works because if one of them gets too deep, it will have more friction, allowing the other end to catch up

Product Application

As woodworking fasteners, NEWSCREW Dowel Screws with Wood and Metric Thread Zinc Plated connect pieces of wood. They suit applications where you need to join two pieces of wood with a hidden fastener and blind holes.
