Product Feature

NEWSCREW Hex Head Wood Screws is used to fasten wood to wood, or metal to wood, which is a screw specially designed for wood. Wood screws are also similar to machine screws, but the thread on the screw is a special thread for wood screws, which can be directly screwed into wooden components (or parts) to connect a metal (or non-metallic)

part. The advantage of wood screws is that the consolidation ability is stronger than that of nails, and they can be removed and replaced, which is more convenient to use without damaging the wood surface.

Product Application

Hex Head Wood Screws from NEWSCREW are widely used Construction industry, New Energy industry, Furniture industry.
