

EN14399-4 10 HV hex nuts

Ningbo Haixin Hardware is a professional fastener manufacturer. EN14399-4 10 HV hex nuts are the most important products for our factory. We can produce full sizes high strength nuts by cold forging and hot forging. With competitive prices and reliable quality, we hope to become your long-term supplier in China.

EN14399-4 10 HV hex nuts are used as high strength structural bolting assemblies for preload. The products must meet requirements of ISO898-2. Our factory arranges torque test for every batch. All related tests can be carried out in our own lab.
