Product Parameter of the Automotive Rubber Grommets Black:

- ①Product name: **Automotive Rubber Grommets Black**
- ②Material: EPDM NBR Silicon or Can Custom
- ③Logo: Can Custom
- ④Size: Can Custom
- ⑤Can Custom: Black or custom
- ⑥Application: Automotive

⑦ Certifications: IATF16949 ,ISO14001:2015,ROHS,CMC, etc

⑧ Delivery: 30 -50days after sample confirmation

⑨ Sample: 25-30 days

⑩ Payment: 30% deposit, 70% payment before shipment

⑪ Package: PE bags, Cartons,Pallet

⑫ Payment Terms: T/T,L/C and so on.

⑬ Shipment Way: Vessel,Air,Express etc.

Product Feature AND Application of the Automotive Rubber Grommets Black:

Car Rubber Grommets Black is a ring placed around a metal opening to protect an object or material passing through the opening. A normal use is for openings through which wires pass.

They are made from synthetic or natural rubber and molded by various types of molding. Cables are vulnerable to wear on the surface of metal openings, which can cause short circuits. Rubber grommets can prevent this and protect the wires.

We can produce custom rubber grommets solutions to suit any customer's specifications. Our rubber gaskets can be used in various industries such as automotive, medical, plumbing, food/beverage and general industrial fields.

Rubber grommets are useful when wires or pipes must run through metal or other material that can cause damage. More commonly using our custom rubber grommets, any type of cable is secured to sharp edges and corners.
