

### Large Bathroom Mirror

This Amorho® large bathroom mirror updates I design. It comes in a variety of lighting options, from dim to bright, and different intensities of color or whiteness. The most worth mentioning is that the large bathroom mirrors which are provide our factory are all made of 5MM tempered glass, which is shatterproof, durable and will not splash even if broken.

When matching a large bathroom cabinet, you can choose a rectangular horizontal large bathroom mirror. The width of this kind of bathroom mirror is smaller than that of the bathroom cabinet, or the bathroom mirror is about the same width as the bathroom cabinet. If the width of the bathroom mirror is too long and the size of the bathroom cabinet is too short, you will find that the matching is not so beautiful. The height of the bathroom mirror is generally less than half of the width. The specific height depends on the installation of the bathroom cabinet in the bathroom, the bathroom environment and personal preferences. The mirror of our Amorho® brand is very suitable, and the size of the mirror can be customized according to the favorite and bathroom environment

#### Amorho® Large Bathroom Mirror Feature

- Anti-Fog Function: Just click the anti-fog touch button on the mirror, it will be very clear and clean without refracting or warping your image.
- Super Bright Dimmable: The Amorho Large Bathroom Mirror has a very bright premium LED light. Brightness can be adjusted by pressing the middle button.
- High-quality material: Made of 5MM tempered glass, shatterproof, sturdy and durable

## SAFETY TEMPERED GLASS MIRROR
