

Pan Washer Wood Screw

Factory direct supply

Jiaxing Chishing® Precision Hardware Technology Co.,Ltd founded in 2005, mainly produces drywall screw,pallets screw,chipboard screw,straw rope screw,self tapping screw,self drilling screw,pan washer wood screw and bolt etc.the company has always been pioneering and innovative, adhering to the business philosophy of "professionalism, integrity and win-win",taking "the most reasonable price,the most perfect service and the best quality products" as the service purpose, and in line with International Fastener manufacturing standards Bravely taking the pioneer of industry self-discipline,striving to improve the product line,obtaining invention patents for many times, becoming a member unit of fastener industry association, cooperating with suppliers for many years,and winning unanimous praise with excellent value and uncompromising quality.

Characteristics and applications of Jiaxing Chishing® hexagon wood screw

According to the different types of screw heads,common wood screws can be divided into round head type,flat head type,oval head type or hexagonal head type. Among them,the materials of pan washer wood screws are mainly steel,iron and copper.

Purpose of pan washer wood screw:similar to machine screw, but the thread on the screw is a special rib for wood screw, which can be directly screwed into wood components (or parts). Generally,pan washer wood screws are polished,which are often used to install hinges,hooks and other hardware accessories.The specification is determined by the diameter,length and nail head type of the rod.

The advantage of pan washer wood screw is that its consolidation capacity is stronger than that of nailing,and it can be removed and replaced,which is less harmful to the wood surface and more convenient to use.

Pan washer wood screw is a kind of nail specially designed for wood.After entering the wood,it will be firmly embedded in it.If the wood is not rotten,it is impossible to pull it out.Even if it is forcibly pulled out,it will bring out the nearby wood.

The process is controlled layer by layer, and everyone pays attention to quality.

(1) Quality: Products use high-quality materials to ensure quality. We have a professional QC team to inspect every project from production to packaging. And before leaving the factory, all specifications of products are sampled and tested to ensure stable quality. We guarantee the high-quality coating and low roughness of screws.

(2) Product features: Straight, not easy to break, sharp thread, good drillability.

(3) Strict quality control: For each order, the quality control department will conduct strict inspection before delivery. Poor quality will be avoided in the door.

(4) Transportation: We have transportation department and freight forwarder, so we can ensure faster delivery and better protection of goods.

(5) Efficiency: Fast production time, only 260 minutes away from the nearest Shanghai port.

(6) Service: Customer service answers customer questions online 24 hours a day, and uses high-quality materials to ensure quality.

PS: Before shipment, we will sample the screws of each specification for basic test. The basic test items we do: hardness test, yield ratio, torque value, anti slip coefficient, tensile strength, nondestructive testing, stress test, thread test, size test, preload test. If you have requirements, you can also carry out salt spray test and fault analysis. Let you buy at ease and use at ease.

◇ FAQ ◇

Q1. Are you a manufacturer or a trading company?

A1: We are a professional manufacturer.

Q2. What are your terms of payment?

A11: Wire transfer 30% as the deposit, and the remaining 70% shall be paid before delivery.

Q3. Is OEM acceptable?

A3: We accept OEM and ODM as your requirements, and guarantee competitive price and quality to serve you.

Q4. Do you provide samples? Free or charged?

A4:Yes,we can provide you with samples to test and check the quality.If the sample is in stock,it will be provided free of charge

Factory direct supply

Product advantages:

1. Use good quality material to ensure the quality
2. High quality coating and low roughness
3. Straight,not easy to broken
4. Sharp thread,good drilling
5. Stable quality
6. Fast production time

Pan washer wood screw product parameter

SPECIFICATION

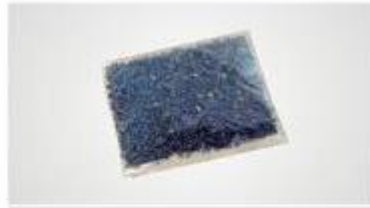

Type	Wood Screw
Product Name	Pan washer Wood Screw
Standard	GB/DIN/BSW/ISO/ANSI
Color	Blue,Colour
Material	Carbon Steel(C1022A)
Surface Treatment	Zinc Plating
Head Type	Pan Washer
Groove Type	Phillips
Point	Drill Point or Sharp Point
Size	M3-M6.3,M8,M10,12#,14#
Length	30-200mm
Roughness	Ra0.4-1.6
Features	Good Anti Corrosion Ability
HS Code	7318130000 7318151090
Sample	Provide
MOQ	1000000Pieces
Transport Package	Bulk,Bag,Box,Plastic Barrel
Price	FOB Ningbo or Shanghai port

Payment method	T/T
Delivery Time	30-60days
Production Capacity	500Tons/Month
Origin	Zhejiang China
OEM	Support OEM

Instructions for the use of Jiaying Chishing® pan washer wood screws

Tools for installing pan washer wood screws:the screwdriver is its loading and unloading tool,and its shape matches the groove shape of the wood screw head,and there are two kinds of slotted and cross shaped;In addition,there is a special screwdriver installed on the bow drill,which is suitable for loading and unloading larger wood screws,which is more convenient and labor-saving.Another thing to pay attention to is that wood screws must be screwed in with a screwdriver. Never knock in with a hammer,which will damage the surrounding wood.

Packing method of pan washer wood screws

We usually use bulk,color box,Kraft carton,PC plastic box,PC plastic bucket,tray and other packaging methods.
Of course, customers can also customize.
