

ASZT 19 SEER Two Stage Heat

Adjusts to your comfort needs and adapts to your technology needs.

Wholesale advanced, easy-maintainable, latest Selling ASZT 19 SEER Two Stage Heat Pump from AirStow. As one of the ASZT 19 SEER Two Stage Heat Pump manufacturers, suppliers and factory, we have our own brands. If you are interested in our high-quality ASZT 19 SEER Two Stage Heat Pump, please contact us.

You are welcomed to come to our factory to buy the high-quality ASZT 19 SEER Two Stage Heat Pump. You can rest assured to buy discount product from us. We look forward to cooperating with you, if you want to know more, you can consult us now, we will reply to you in time!

ASZT 19 SEER Two Stage Heat Pump

Adjusts to your comfort needs and adapts to your technology needs.

Features

- Advanced control system Demand Defrost minimizes defrost cycles, reducing energy costs while maintaining comfort.
- Impact-resistant, powder-painted, galvanized steel two-piece extruded louver coil guard adds protection and makes cleaning easy, and an automotive-grade, powder-paint finish rated at 1000-hours salt spray provides years of corrosion-free performance
- Works with conventional thermostats 3 full color, Wi-Fi enabled thermostat provides remote control and monitoring

- Climate Set™ – provides pre-configured operating profiles the installing contractor can select during set-up to fine tune the system's operation for either Humid, Dry, or Normal climates. Additional fine-tune adjustments are always available to provide a custom comfort solution. (Feature available when a variable speed indoor air mover is utilized.)
- Unit can be matched with a Airstow® residential gas furnace to create a dual-fuel comfort system that automatically switches between heat sources based on energy costs or capacity
- Two-stage scroll compressor is a robust, time-tested design that can stand up to the rigors presented while comfort conditioning a home
- Integrates with the Communicating Zoning System
- Communications Capable – Designed to operate as a conventionally wired system or as a communicating system requiring only 4 thermostat wires between the outdoor and indoor units, the communicating system provides self-commissioning on start-up as well as the ability to check system status at the outdoor unit, thermostat, or remotely using the designated App.

Technical Specification
