Parameter of Ceramic Water Heater Element for Toilet Seat

Heater Name	Ceramic Water Heater Element for Toilet Seat
Working Voltage	120V/230V
Working Power	800W-3500W
Dimension	80mm long*8.0 OD or Customization
Resistance	Accordingly
Leads	Nickel wires and cables or as required
Insulation Sleeve	Accordingly

What Is Good About Ceramic Water Heater Element for Toilet Seat?

Accurate heating: When your ceramic heater has been installed with a fan, it's very easy to aim the airflow exactly where you want the hot air. The heaters fan also helps to evenly distribute warm air through the room.

Overheating: The ceramic heating elements have mechanisms in place. This is preventing the system from overheating. This heater comes with a tilt detection feature. It sits at the base of the heater. If any tilting or wrong movement will be detected.

So, if something went wrong the heater will automatically shut down. That's why it's reducing the risk of a potential accident and ensuring the safety of its user.

FAQ

Where is the main application of your heater element?
