

Warp Knitting Beam For Knitting Machine

ONEREEL® is the top Warp Knitting Beam for Knitting Machine manufacturer and supplier in China. With more than 50 sets of advanced equipment, such as precision digital machine tools, punching machines, laser engraving machines, anodizing equipment, etc., Warp Knitting Beam for Knitting Machine is also called Warp Knitting Beam. The warp package form of warping is also the name of the matching accessories of the warping machine. Its size determines the warp capacity of the package, which should be adapted to the warping machine and sizing machine used. The main dimensional parameters are the width between the discs, the diameter of the side disc, the diameter of the shaft tube, and the length of the shaft core. [Specifications are developing towards wide and large packages, and the diameter of the side disc is usually 700~1000mm. The width between the discs of the warp beam for processing tire cord can reach 5500mm, and the diameter of the side disc can reach 2500mm.

Product Description

This Warp Knitting Beam for Knitting Machine is a high-quality product.

ONEREEL® Warp Knitting Beam for Knitting Machine. ONEREEL is one of the finest knitting machine warp beam manufacturer that are suitable for spun and filament yarn. It can achieve the goals of less energy consumption, lower noise and more stable equipment operation. As per the emerging requirements of our clients we filter sophisticated technology and world-class quality raw material. We offer variety of warp beam flanges for different kinds of yarn quality as per current market trends. The aluminum warp beam, offered by us, is suitable for Benninger, West point, Suker, Amrit lakshmi, Hacoba etc.

ONEREEL® Warp Knitting Beam for Knitting Machine Parameter (Specification)

Place of Origin:	Ningbo, China (Mainland)	Color:	Random
Brand Name:	ONEREEL	Material:	Metal
Export	Global	Package:	Negotiated

Ningbo Onereel Machine Co., Ltd.

Tel:+86-574-86887181

Email:sales@onereel.cn

Market:			
Certification:	ISO9001	Quality:	Guaranteed
Product name	Warp Knitting Beam		
Beam Size	30"X21", 30 inches X 21 inches		
Material	Aluminum Alloy		
Weight	80kgs, 85kgs, 95kgs		
Suitable Yarn	Polyester, nylon, cotton, mono and multi filament yarn		

ONEREEL Warp Knitting Beam for Knitting Machine Feature and Application

1. Main sizes: 14"x21", 21" x 21", 30" x 21", 40" x 21" and 21" x 42", 30" x 42", 40" x 42", 42" x 21", 42" x 42". What is more, we can also produce specific warping beams based on customers' specific requirements.
2. Flange: Made of high strength aluminum alloy and manufactured by forging, it has excellent rigidity and durability.
C: Barrel: Made of high strength aluminum alloy and manufactured by centrifugal forging, it has high strength and precision.
3. Welding : Welded by automatic Argon welding machine, has good precision and strength. A: Main sizes: 14"x21", 21" x 21", 30" x 21", 40" x 21" and 21" x 42", 30" x 42", 40" x 42", 42" x 21", 42" x 42". What is more, we can also produce specific warping beams based on customers' specific requirements.
4. Flange: Made of high strength aluminum alloy and manufactured by forging, it has excellent rigidity and durability.
C: Barrel: Made of high strength aluminum alloy and manufactured by centrifugal forging, it has high strength and precision.
5. Welding: Welded by automatic Argon welding machine, has good precision and strength.

ONEREEL Warp Knitting Beam for Knitting Machine Details

ONEREEL Warp Knitting Beam for Knitting Machine is widely used in the Warp knitting and technical textiles

- . Flange and barrel: high-strength aluminum alloy material, forged by low-pressure centrifugal, and heat-treated, so it has the best rigidity and durability;
- Welding: High-precision welding is carried out by means of a robotic automatic welding method using a metal inert gas;

ONEREEL[®]

www.cable-spool.com

Since the function of the dynamic balance can maintain good compatibility with the textile machine even if it is rotated at a high degree;

After hard machine coating, it completely prevents corrosion and surface scratches, and maintains its durability and precision even after several years of use;

Long warrantee life time.

**FAQ**

What is your products standardization?

our products strictly comply with ISO9001 and CE standards

Can you can design the spool according to our size?

Yes, we have a professional team of engineers who can complete the manufacture of the spool you provid

How many years have your company made this kind of spool?

we have been making spools for ten years

Are you a trading company or a manufacturer?

we are a manufacturer of spool technology and design

How long is your delivery time?

we will deliver the order as soon as we receive it
