

Zinc Plated Skeleton Cable Reel

ONEREEL® is one of the manufacturers in the production of steel reels, drums, bobbins and handling equipment in China for the wire and cable industry. ONEREEL® is the top Zinc Plated Skeleton Cable Reel manufacturer and supplier in China. We can easily accommodate demand for reels and give you reasonable discount for your large purchase. The quality of Zinc Plated Skeleton Cable Reel is reliable. ONEREEL as a manufacturer have the latest designs, the most reliable quality and the best prices. If you interesting in our Zinc Plated Skeleton Cable Reel, You can get Pricelist freely for your reference. ONEREEL® as a supplier in China, and have our own factory, can offer wholesale price. ONEREEL® as a supplier in China, and have our own factory, can offer wholesale price.

Product Description

This latest Zinc Plated Skeleton Cable Reel is our factory's latest design. The series of extremely sturdy "skeleton" cable reels are especially suited for life on the road, as well as at home in a TV or movie studio. They are made of heavy duty welded steel tubes coated with monolithic passivated zinc plates. It can also be combined with a trolley and a roll rack for transportation. As a supplier, we can offer the most favorable wholesale prices.

ONEREEL® Zinc Plated Skeleton Cable Reel Parameter (Specification)

Type	200M	400M	200M	300M	500M
ONEREEL code:	35-5191	35-5192	35-5193	35-5194	35-5195
	Standard	Standard	Triple Flange	Triple Flange	Triple Flange
Flange diameter:	615mm	615mm	615mm	615mm	615mm
Hub diameter:	230mm	230mm	230mm	230mm	230mm
Drum hub width:	136mm	226mm	118mm	173mm	208mm

ONEREEL® Zinc Plated Skeleton Cable Reel Feature and Application

Two-Flange Reels - Trial, multicore audio and heavy-duty power cables

This is a traditional skeleton design with a short length of space in the hub from the inside end of the cable that can be pulled out and connected to the tailgate or wall box without fully unwinding the cable.

Three-Flange Reels - SMPTE 311M HDTV fiber hybrid cables

These are development of traditional style drum designed in conjunction with BBC external broadcasts specifically to accommodate the SMPTE 311M fiber-optic hybrid camera cable.

As the combined weight of a drum and cable may exceed 70Kg, a heavy-duty trolley is available.

ONEREEL Zinc Plated Skeleton Cable Reel Details

There are two types of galvanized skeleton cable reels: double flange reels and three flange reels. Longer fiber lengths are usually preferred, as this avoids the need to connect shorter components and reduces the number of drums that must be brought to the field. However, it is inconvenient to unfold the entire length to approach the inner (CCU) end when the entire length is not required in one position. For copper cables, it is usually

possible to store the shorter length of the inner end of the cable (which usually needs to be connected to a tailgate or wall box) in the hub of the reel, even when the cable is not fully unfolded. In order to avoid damaging the fiber, the minimum bending radius of the fiber hybrid cable must be strictly adhered to, so it is not possible to tightly wrap the inner end of the fiber within a few meters of the main hub.

**FAQ**

What is your products standardization?

our products strictly comply with ISO9001 and CE standards

Can you can design the spool according to our size?

Yes, we have a professional team of engineers who can complete the manufacture of the spool you provid

How many years have your company made this kind of spool?

we have been making spools for ten years

Are you a trading company or a manufacturer?

Ningbo Onereel Machine Co., Ltd.

Tel: +86-574-86887181

Email: sales@onereel.cn

ONEREEL®
