

### Industrial tilter with conveyor

The Yilane Tech® Industrial Tilters with Conveyor can be used for dislocation of different horizontal or vertical objects. High quality industrial Tilters with Conveyor from China can be stopped freely and the tilter locked in current position.

### Product Description

The Yilane Tech® Industrial Tilters with Conveyor is a kind of equipment that is conducive to environmental protection. The noise control level of the place where the equipment is located must meet the noise control level required by the country. Waste gas and waste water discharge meet the corresponding requirements of national discharge standards.

### The Yilane Tech® Industrial Tilters with Conveyor Basic features

- 1) Special double chain drive, oblique gear & worm speed reducer is adopted
- 2) Four-roller device wrapped with polyurethane.
- 3) Inverter multi-speed control, smooth & safe
- 4) Independent control table allows remote operation.
- 5) Multiple position limit system ensures safe operation.
- 6) Machine can be stopped freely; the tilter locked in current position.
- 7) Tilting by hydraulic, double backpressure safe and reliable.
- 8) Reasonable hydraulic pipe layout, oil leak-proof design.
