

Plastic straight pipe bagging packaging unit

This machine is suitable for automatic bagging and packaging of PVC, PPR, PE, aluminum plastic composite and other plastic straight pipes. The process flow includes: front-end feeding -- plastic bag or Woven bag bagging -- end winding and fixing -- printing and labeling -- automatic stacking into the frame.

Basic composition

The unit is composed of front-end feeding system, bagging machine, automatic sealing machine or automatic edge sewing machine, end winding and fixing equipment, printing and labeling machine, automatic stacking and framing equipment, etc

Pipe range

Pipe name: PVC, PPR, PE, aluminum plastic composite (PAP), etc

Pipe diameter: 20mm~110mm

Length: 2000mm, 3000mm, 4000mm, 6000mm Bundled excircle: 100-200mm

packaging

1) Plastic coiled material

Double layer cylinder

Outer diameter: 600mm

Width: 200-400mm; inner diameter: 76mm

2) Braided tape roll

Layer barrel material

Outer diameter: 600mm

Width: 200-400mm; inner diameter: 76mm
