

**Wide width steel coil
aluminum core-piercing winding
packaging machine (double C type)**

This machine is specially designed and manufactured for wrapping and packaging of ultra wide coiled materials. It can solve the problem that people cannot pack wide coiled materials manually, and can realize long-term continuous operation

Product Description

This machine is mainly designed and manufactured for the winding and packaging of large steel coils, aluminum coils, coil elements and other products, to solve the problem that people cannot package wide coils manually. It is a high degree of automation, high integration, safe and practical packaging equipment. It has multiple stations to and fro and can realize continuous operation for a long time.

Basic composition

It is composed of packaging host, material transport trolley, console, guardrail, etc.

Scope of application

Outer diameter: 800mm~2100mm Inner diameter: 405mm~520mm Width: 800mm~2300mm Weight: ≤ 12T

Number of packaging stations: 2

Applicable packaging material: LLDPE winding film

Winding overlap rate: 30%~80% adjustable

Packaging material specification: film roll width 150mm, film roll outer diameter 160mm, film roll inner diameter 76mm;
