Bean Sprout Incubators

As the professional manufacture, we would like to provide you Chongcheng Machinery Bean sprout incubators. Linq Chongcheng Machinery Factory is a leading enterprise of bean sprout machine equipment production, bean sprout machine supplier. Bean sprout incubators use Bean sprout incubators to produce bean sprouts, save space, improve efficiency and bean sprout quality.

The following is the introduction of high quality Chongcheng Machinery Bean sprout incubators, hoping to help you better understand Bean sprout incubators. Welcome new and old customers to continue to cooperate with us to create a better future!

Product specifications:

Model: custom

Material: All 304 stainless steel

Product FEATURES AND APPLICATIONS:

Features: Bean sprout incubators use the conical design principle, the upper mouth is large, the lower mouth is small, square design, each bucket 1000 jin -2000 jin, using this design, first of all, there is no dead Angle, then the bean sprout bucket extrusion in the growth process, the upper mouth cooling effect is good, the lower mouth is small, water flow down concentrated, Using bean sprout hatching barrel to produce bean sprouts, saving production area, improve efficiency, bean sprouts quality is good.

Product usage: Suitable for bean sprout production and incubation

Bean sprout incubators Equipment principle:

The conical design principle is adopted, the upper mouth is big, the lower mouth is small, the square design has no dead Angle, and then the extrusion of the bean sprout bucket in the growth process, the upper mouth is large, the lower mouth is small, and the water flow is concentrated
