## **Bean Sprout Pre-cooling Machine**

Linqu Chongcheng Food Machinery Factory is Bean sprout pre-cooling machine manufacturers and suppliers in China who can wholesale Bean sprout pre-cooling machine. We can provide professional service and better price for you. If you interested in our products, please contact with us. We follow the quality of rest assured that the price of conscience, dedicated service.

High quality Chongcheng Machinery Bean sprout pre-cooling machine is offered by China manufacturer Linqu Chongcheng Machinery Factory. Buy Bean sprout pre-cooling machine which is of high quality directly with low price. The Following is the introduction of it to making you better understanding it.

### **Product Specifications:**

Model: custom

Material: All 304 stainless steel

### **Product FEATURES AND APPLICATIONS:**

Features: The Bean sprout pre-cooling machine is composed of two parts: the transmission tank and the cooling tank. First, the cooling tank pre-cools the water to about 5 degrees through the refrigerator, and then circulates it to the transmission tank through the pipeline pump, so that the water is fully mixed to reach the water temperature. After the bean sprout basket is equipped with the transmission chain, the whole bean sprout basket is dipped into the water for a walk. The bean sprouts in the bean sprout basket are fully pre-cooled from inside to outside to achieve the effect of fresh preservation, slow green, storage and cooling resistance, and the longest can be stored for about 7-10 days.

Product usage: Suitable for bean sprouts preservation, slow green, storage, cooling

Bean sprout pre-cooling machine Equipment principle:

Composed of two parts of the transmission pool and the refrigeration pool, the first refrigeration pool
