Bean Sprouts Production Line

Linqu Chongcheng Food Machinery Factory as a professional supplier and manufacture, who specialized in producing Chongcheng Machinery Bean sprouts production line, has been the largest bean sprout machinery and equipment production base in China in terms of scale and technology. Bean sprout water line to reduce the amount of labor, water uniform, so that the quality of bean sprouts has been greatly improved. Hoping build a long-term business relationship in the near future!

Linqu Chongcheng Food Machinery Factory is one of China Bean sprouts production line manufacturers and suppliers, if you are looking for the best box bean sprouting machine with low price, you just feel free to consult us right now!

Product Specifications:

Model: custom

Material: All 304 stainless steel

Product Features and Applications:

Features: Chongcheng Machinery Bean sprouts production line is through the drench pipe, coil, sports car installed on the top of the bean sprouts, through the control system, each time, the size of the water, how much, speed, water pouring, through the controller parameter adjustment for comprehensive control, to reach the automation of the water.

Product usage: Suitable for the production of large bean sprouts

Bean Sprouts Production Line Equipment Principle:

Efficient and Safe

Through the parameter adjustment of the controller for comprehensive control, to achieve the automation of drenching water, reduce the amount of labor, uniform drenching water, so that the quality of bean sprouts has been greatly improved.

Product Details Introduction:

www.lqccmilling.com

Bean sprouts production line comprehensively controls each time period, the size, the amount, the speed, the water pouring, by controlling parameter adjustment.
