## **Mung Bean Sprout Cleaning Machine**

You are welcomed to come to our factory to buy the latest selling, low price, and high-quality Mung bean sprout cleaning machine. Linqu hopes to establish friendly cooperative relationship with your company with high quality products, reasonable price, considerate service and create a better future hand in hand.

With years of experience in production Mung bean sprout cleaning machine, Linqu Chongcheng Machinery Factory can supply a wide range of bean sprout cleaning machine. High quality Mung bean sprout cleaning machine can meet many applications, if you need, please get our online timely service about it. In addition to the product list below, you can also customize your own unique Mung bean sprout cleaning machine according to your specific needs.

### **Product Specifications:**

Model: custom

Material: All 304 stainless steel

### **Product FEATURES AND APPLICATIONS:**

**Features:** The Mung bean sprout cleaning machine is composed of four round drums. The mung bean sprouts are poured into the cleaning machine, which are dispersed and pushed forward by the advancing water flow. When passing through the constantly rotating drum, the scattered mung bean sprout shells floating on the water are collected into the drum, and the mung bean sprout shells are rotated into the collection tank by constantly rotating. Some bean sprouts will sink to the bottom of the shell. The shell will be taken out through the blender. The shell removal rate will reach more than 98%, and about 2-5 tons of mung bean sprouts will be processed per hour.

**Product usage:** Suitable for the cleaning of mung bean sprouts

### **Mung bean sprout cleaning machine Equipment principle:**

Mung bean sprout cleaning machine is poured into the cleaning machine, which is dispersed and pushed forward by the forward flow of water. When passing through the constantly rotating drum,
