Product Description

There are many kinds of car lamps. Including headlights, fog lights, taillights, signal lights, indicators, turn signals and so on. For the headlight, on a rainy day or high humidity environment often encounter the problem of fog, so we need to quickly dispersed the fog, part of the headlamps with direct connect the structure of the atmosphere, headlights off caused by negative pressure can into the external moisture, so that the fog scene is more serious, and can cause damage to light within the element, Xin gourmet and high breathable breathable hat with a back film good solves the problem of car headlights are scattered fog, while quickly dispersed the fog, and can provide excellent protection in the operation process of headlight, block the invasion of the outside water and dust, etc.

Bizhenpin Car Lamp Waterproof Film, even under extreme road conditions, is waterproof and works well for a long time. For fog lights, taillights, signal lights, indicator lights, turn signals and other lamps, although the light component power is not so large as the headlights, but the space is relatively small, so the same need for good air permeability, high protection performance protection products.

Bizhenpin's Car Lamp Waterproof Film, tailored for a variety of car lights, is a great solution to all kinds of car lights waterproof, improve the reliability of car lights, extend the life of car lights, and shorten the design and assembly time. Xin acura thin oil film can also help the car headlights block from gasoline, diesel oil, hydraulic oil and lubricating oil pollution.
