

Packaging Breathable Gasket

With years of experience in production Packaging Breathable Gasket, Kunshan Bizhenpin Film New Material Technology Co., Ltd. can supply a wide range of Packaging Breathable Gasket. High quality Packaging Breathable Gasket can meet many

Product Description

The main form of waterproof and sound permeable film is waterproof and sound permeable film with adhesive back. Waterproof and sound permeable film with back glue is made of waterproof and sound permeable film film and double-sided tape. It is generally sold in sheet or roll form. Bizhenpin Packaging Breathable Gasket is available in IP54, IP65, IP67 and IP68 grades, providing strong water and dust resistance while maintaining perfect sound quality.

Bizhenpin Packaging Breathable Gasket has the following advantages: Professional sound transmission processing to ensure the lowest sound attenuation, lowest distortion and best signal-to-noise ratio. Select the adhesive with strong viscosity and excellent water resistance, which can firmly adhere to the surface of all kinds of products, and withstand the test of various extreme environments and long-term use. Can provide a variety of specifications and sizes, and accept customization. Thin and lightweight, can be installed in a small space. Easy installation, manual or automatic installation.
