

Packaging Breathable Sound-permeable Membrane

Kunshan Bizhenpin Film New Material Technology Co., Ltd. is a professional leader China Packaging Breathable Sound-permeable Membrane manufacturer with high quality and reasonable price. Welcome to contact us.

Product Description

The unique advantages of Packaging Breathable Sound-permeable Membrane:

The SOUND TRANSMISSION material is adopted to minimize the sound loss in the process of sound transmission. It provides a strong waterproof and dustproof barrier for indoor and outdoor sound equipment. The adhesive with strong viscosity can be applied in harsh environment and firmly adhered to the surface of various products.

Both standard size, can also be customized products.

Thin and lightweight, it is ideal for devices placed in limited Spaces.

Easy installation, manual or automatic installation.

When the equipment is exposed to dust, splashed with liquid or immersed in liquid, it can provide effective protection for the equipment. The highest protection level can reach IP67.
