Of course, also essential is our perfect after-sales service. If you are interested in our Smartphone Waterproof Sound Permeable Membrane services, you can consult us now, we will reply to you in time!

Product Description

Inside Smartphone Waterproof Sound Permeable Membrane Inside:

The more valuable and functional phones and smartphones are, the more frequently they are used -- and the more likely they are to be exposed to environmental hazards that can easily cause damage. Handset manufacturers rely on expertise and products to achieve new levels of dust, water, and immersion in their devices while maintaining transparent sound.

As an innovator of acoustic breathable materials technology, Bizhenpin is your partner in the design and development of customized water and breathable mobile phone solutions tailored to your product profile to meet IP54, IP64, IP 65, IP67 or IP68 standards.

Smartphone Teflon Waterproof membranes protect dust and liquids from immersion into acoustic devices and equipment with IP68 Permeable class. The highly breathable expanded TEflon film rapidly equalizes the pressure in the front chamber, consistently delivering exceptional sound quality in a variety of design conditions.

Improve phone Sound effects with Smartphone Waterproof Sound Permeable Membrane, and enhance the sound-permeable performance under IP54 (dust and spillage) and IP67 and IP68 (immersion) waterproof Membrane.
