

## Hydrogen Water Maker Bottle

KSW® Hydrogen Water Maker Bottle is a sort of device which can make dissolved hydrogen and put into water for long time, providing rich hydrogen water for people to drink. Infusing any drinkable water with dissolved hydrogen will help our bodies fight harmful free radicals, prevent oxidative stress, and protect against illness and disease.

## Product Description

KSW® Hydrogen Water Maker Bottle produces Molecular hydrogen by electrolysis of water. Molecular hydrogen is easily diffused into tissues and cells, it protects RNA, DNA and proteins from toxins and dangerous reactions. It also prevents healthy cells from dying.

## KSW® Hydrogen Water Maker Bottle features

---

Compatible with common bottle water  
Easy to use anywhere anytime to produce fresh hydrogen-rich water,  
High-efficient platinum electrode,  
Utilizes Proton Exchange Membrane (PEM) to separate oxygen away from hydrogen,  
Waste water tank in the bottle base,  
Hydrogen concentration is up to 800- 1200 ppb after 5 or 8 minutes of electrolysis,  
ORP (reduction potential) is -250 to -450mv after 5 or 8 minutes of electrolysis,  
360ml bottle, made from Tritan material, BPA free,  
Rechargeable lithium battery, 7.4V, 750mAh

## KSW® Hydrogen Water Maker Bottle Technical data

---

Model NO.	K1
Electrical supply:	750 mAh Lithium battery
Capacity:	360 ml

Hydrogen generator:	SPE electrolyzer
Running time	5 or 8 minutes, 2 options
Hydrogen concentration:	800~1200 ppb
ORP:	-250 to -450mv
Total power:	5 watt
Dimension:	37x50x80 cm
Weight	380 g
