

## **Stainless Steel High Capacity Cold Water Cooler**

KSW® Stainless Steel High Capacity Cold Water Cooler is the smartest choice for a public place with large flow of people. Large size water cooler has large space inside for Compressor cooling system and all kinds of water purifier system such as high capacity reverse osmosis filtration.

### **Product Description**

KSW® Stainless Steel High Capacity Cold Water Cooler has ultra large interior space. The refrigeration and purification functions can be customized. Our experienced engineers are adept at using advanced software modeling, enabling us to meet your customized requirements

### **KSW® Stainless Steel High Capacity Cold Water Cooler Features**

---

Stainless steel frame and case, great strength, firm and durable  
Fan-cooled condenser made of copper tube and aluminium fins  
Water sink features a drainage hose system  
Inclosed cold water tank with external copper tube evaporator

### **KSW® Stainless Steel High Capacity Cold Water Cooler Technical data**

---

Model NO.	KSW-103
Water options	Cold water
water faucets:	2 cold water faucets
Cold tank capacity:	20L, SS304, 25L/h
Total power:	300 watt
Weight	47 kg
