

Aluminium Coil Slitting Machine

KINGREAL MACHINERY is a professional Aluminium Coil Slitting Machine manufacturer and supplier in China. KINGREAL has more than 20 years of production experience, our machines focus on automation and high efficiency. Looking forward to reaching agreements with customers from all over the world.

Product Description

Description Of Aluminum Coil Slitting Machine

KINGREAL provide the aluminum coil slitting machine, Whether it is a standard aluminum slitter line or a special customized aluminum slitting machine, KINGREAL factory has dedicated engineers to design and put into production.

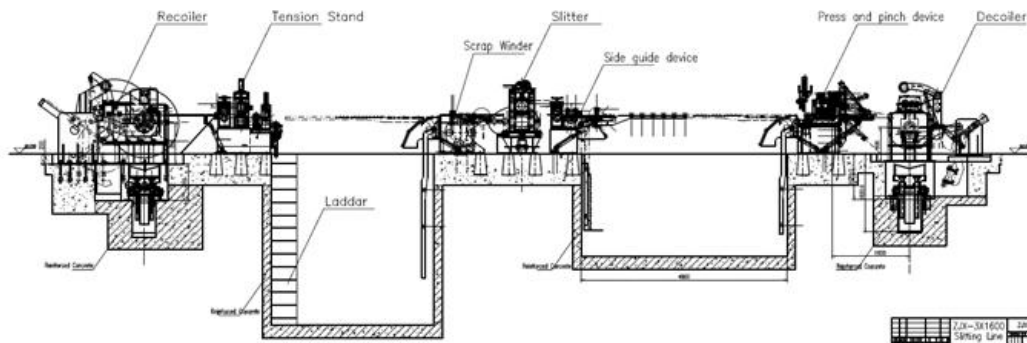

KINGREAL aluminum coil slitting machine can automatically cut and rewind the aluminum coil material precisely. The cutting width of the slitting machine can be adjusted according to the needs of customers, and the barrel hoop sets the gap between the cutters to achieve the highest quality trimming.

Aluminum Coil Slitting Machine Produce process

Decoiler -- Clamp Feeding -- Roller Channel -- Alignment Guiding -- Slitting -- Waste Edge Curling -- Live Sleeve -- Rewinding -- Bundling -- Discharge

Advantage Of Aluminum Coil Slitting Machine

- High Precision Slitter

Aluminum coil products have extremely high requirements for the accuracy of the slitting machine. Therefore, KINGREAL has specialized engineers to design and monitor the slitting parts of the machine to ensure the accuracy of the product.

- Fully automatic production line

KINGREAL aluminum slitter line is full automatic, which can improve production efficiency, save labor costs and achieve product benefits.

ADVANTAGE/ SLITTING LINE MACHINE

• Customized Coil Process Solutions

In addition to the aluminum coil slitting machine, our slitting machine can also slit other materials. Such as stainless steel, silicon steel, roll-coated plate and PPGL, etc. According to the different production needs of customers, KINGREAL also has a professional engineer team to design.

• Rich project experience

KINGREAL has more than 20 years of production experience, not only has a professional team but also has its own factory.

OUR CUSTOMERS

Establish good communication relationship with customers

Application Of Aluminum Slit Coil

- Automotive Part
- Electrical
- Tags
- Fin Tube Application
- Other Metal Material Manufacturer

KINGREAL Aluminum Coil Slitting Machine Parameter

Material	Aluminum
Coil Thickness	0.5-3mm
Coil With	500-1600mm
Coil I.D	Φ508 mm
Coil O.D	φ1600mm (Max)
Coil Weight	20 T

Machine Power	380V/50Hz/3Ph
Slitting Speed	0-220m/min
Capacity	210 Kw
Machine Color	Customized

What does our factory look like?

How To Transport The Machine?

How to transport heavy machinery efficiently and safely is often a huge challenge. The following is our machine packing and loading process.
