

### Battery for Aerial Work Platform

EVK company has been focusing on the field of Battery for Aerial Work Platform Aerial platform was first popular in the American market, and then it was gradually widely used all over the world. The appearance of aerial work platform improves the working safety of construction workers and the working efficiency. At present, hundreds of thousands of aerial work platforms around the world are making their own contribution to the progress of mankind every day.

### Product Description

The EVK Production of Battery for Aerial Work Platform produced by is mainly used in the field of Prowl Car. It is a kind of lead-acid battery, The voltage of the battery is 6 volts and 12 volts. The amperage is 100Ah, 200Ah, it model is 105/125/145/875/1275. We can produce the products that customers need according to their requirements. I believe we are your wise choice!

### Battery for Prowl Car Parameter (Specification)

Ann number	voltage
100	12V
180	6V
200	6V
230	6V

### The EVK Production of Battery for Aerial Work Platform Feature And Application

The production equipment and technology of EVK Battery for Aerial Work Platform are the most advanced in the world at present, which ensures the high quality of products. The raw materials used are all first-class brand-new materials. The end plate material is 99 pure copper, which ensures the output of large current. Our products are widely used in patrol cars, sightseeing bus, car washers and other equipment!

### The EVK Production of Battery for Aerial Work Platform Details

The EVK Production of Battery for Aerial Work Platform. It is produced in strict accordance with international standards, and the grid adopts the latest integrated stamping technology, which ensures that the grid will not be broken even with high current. The battery head adopts 99% pure copper, which will not melt due to high current, and also ensures the output of high current. Pure white shell is very beautiful, and an ABS flame-retardant shell,
