

Battery for Electric Car

As the professional manufacturer, we would like to provide you Battery for Electric Car. Electric cars have come into people's lives, because they don't need to be refueled, and they only need to be recharged, which is very convenient to use! EVK company is committed to the research and development and production of new energy batteries. The electric car batteries produced by the company are suitable for all kinds of electric cars. We can produce lead-acid and lithium batteries! Please consult our staff for details!

Product Description

The EVK Production of electric car batteries produced by is mainly used in the field of Prowl Car. It is a kind of lead-acid battery, The voltage of the battery is 6 volts, 8 volts and 12 volts. The amperage is 100Ah, 150Ah, 200Ah, and there are other amperages. We can produce the products that customers need according to their requirements. I believe we are your wise choice!

Battery for Electric Car Parameter (Specification)

Ann number	voltage
100	12V
150	8V
200	6V

The EVK Production of Battery for Electric Car Feature And Application

The production equipment and technology of EVK Battery for Electric Car are the most advanced in the world at present, which ensures the high quality of products. The raw materials used are all first-class brand-new materials. The end plate material is 99 pure copper, which ensures the output of large current. Our products are widely used in patrol cars, sightseeing bus, car washers and other equipment. Our products are Lithium batteries can also be applied to these devices. Each lithium battery is packed in a very safe explosion-proof box with a very high safety factor.

The EVK Production of Battery for Electric Car Details

The EVK Production of Battery for Electric Car. It is produced in strict accordance with international standards, and the grid adopts the latest integrated stamping technology, which ensures that the grid will not be broken even with high current. The battery head adopts 99% pure copper, which will not melt due to high current, and also ensures the output of high current. Pure white shell is very beautiful, and an ABS flame-retardant shell. Each lithium battery is packed in a very safe explosion-proof box with a very high safety factor.
