

Toyota Levin Hybrid Battery

Toyota Levin Hybrid Battery is product developed by the EVK energy company itself. The products are all produced by the most advanced equipment in the world, and the quality matches the original factory. EVK company has been focusing on the field of new energy power batteries, and built an automatic production line of nickel-hydrogen power batteries with an annual output of 50 million ampere-hours, It is mainly used in HEV/NI-MH Battery, AGV industrial robot, communication base station power supply, energy storage power supply and other fields. Among them, HEV products are 100% consistent with the batteries of Toyota Levin Hybrid , and can be installed at will! Stable high-quality products at the right price. Look forward to becoming your long-term partner in China!

Product Description

The Evk production of Toyota Levin hybrid battery that we produce is mainly used in the field of hybrid cars. It is a square Ni-MH battery module with a nominal voltage of 7.2V, a capacity of 5.5Ah/6A/6.5Ah, and an ABS flame-retardant shell! The modules form a battery assembly, which is 201.6V. The assembly is suitable for Toyota hybrid (Ni-MH battery) series models. EVK provides installation videos or manuals to make your installation worry-free! The installation case of 500,000 car owners, the choice of many car owners, I believe we are your wise choice!

The EVK hybrid battery/Ni-MH battery is produced using ultra-strict production technology, and the production equipment is currently the most advanced in the world. We offer a 3 year or 100,000 km warranty, so you can use it with confidence!

The EVK Production of Toyota Levin Hybrid Battery Feature And Application

Ann number	voltage	Total volt number	Module quantity
5.5Ah	7.2V	201.6V	28 (cuboid)
6Ah	7.2V	201.6V	14 (cylinder)

6.5Ah	7.2V	201.6V	28 (cuboid)
-------	------	--------	-------------

The EVK Production of Toyota Levin Hybrid Battery Feature And Application

EVK hybrid battery/Ni-MH battery Mainly applicable to all Toyota Prius Hybrid ,This product is 100% consistent with the original Toyota Ni-MH battery.

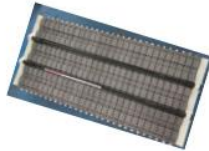

Toyota Levin

Toyota Auris

Toyota Prius

Toyota Corolla

Toyota Mirai

The EVK Production of Toyota Levin Hybrid Battery Feature And Application

The EVK Production of Toyota Levin Hybrid Battery . It is a square Ni-MH battery module with a nominal voltage of 7.2V, a capacity of 5.5Ah/6.5Ah, and an ABS flame-retardant shell, Or cylindrical nickel-hydrogen module, with a capacity of 6Ah and a metal explosion-proof shell.
