ZHENKON
Fasteners

WELCOME TO ZHENKUN FASTENERS

We appreciate your time and interest in learning more about our company and the fastener products we offer.

Ningbo Zhenkun Machinery Co., Ltd. is a leading company specializing in the production and development of high-quality fasteners, with 15 years of experience in the industry. Over the past decade and a half, the company has grown steadily and established a reputation as a trusted supplier of reliable and durable fasteners.

For over 15 years we have been recognized as a world-class producer of outstanding fasteners intended for use in hostile environments and safety-related applications which cover construction, power generation, water work, public utilities, original equipment manufacturers, automotive, etc...

Winson XU
CEO

As founder and CEO of Zhenkun Fasteners Pty Ltd. Winson oversees all sales and operations within the group. Winson recommenced his family's rich history and founded Zhenkun Fasteners in 2009.

Winson has 20 years' experience within the fasteners industry.

Zolo Zhou
Manager of technical department

Graduated from Tongji University in Mechanical Engineering. Used to work for SAIC and MAGNA of the chassis system manufacture, Stamping expert. More than 15 years of manufacturing management experience. Vice-general manager of JinWei Group.

Carson Wang
Plant Manager

Carson is a senior fastener engineer with 18 years of specialized experience in cold heading and hot heading manufacturing. He is highly proficient in fastener standards and specifications. Mr. Carson has extensive experience helping customers develop customized fastener products, especially special fasteners.

Pelin Wo
QC & RD Leader

Committing to hardware & fastener since 1998. Specialist in metal stamping parts, casting parts, forging parts & etc. Besides, unsurpassed professional in IOS quality system management & various quality controlling device to ensure our Quality Commitment!

Sally Wang
Director of Export

11 years leading hardware exports. Expertise in manufacturing, trade, and international markets. Succeeded in procurement, production, sales; grew US/EU clients, \$5M+ sales. Optimistic, outgoing; excels in marketing, client needs analysis.

Lei Zhu
Business Development & Marketing Manager

Young but professional! Lei is proficient in a full set of export & import processes. Specially in clients development, communication, quality controlling, logistics & sourcing! The only purpose is satisfying clients best!

Full-service fastener
manufacturer & distributor

Vendor Managed

ABOUT US

**We are a factory specializing in the
production of fasteners**

Our factory & warehouse located in Beilun Port area in NingBo, which is only 5 km away from the loading port. This provides us with convenient access to transportation by sea, land, and air, enabling us to efficiently serve customers all around the world.

Our modern production workshop is equipped with advanced machinery and testing device to ensure the highest standards of quality. We are proud to have a team of highly skilled technicians and engineers who are dedicated to producing superior quality products that meet and exceed our customers' expectations.

Mission

To supply quality assured products, at competitive prices, from knowledgeable technical experts, effectively, efficiently and with the best reliability in the market.

Values

At Zhenkun, our mission is to provide our customers with the highest quality fasteners and exceptional customer service. We believe in honesty, integrity, and teamwork in everything we do.

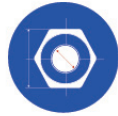

- **Integrity:** We are honest and act within the bounds of the law, ethics, and morality.
- **Service:** We fulfill commitments with enthusiasm.
- **Character:** Our values and decisions define us. We are humble, loyal, and considerate.
- **Accountability:** We take responsibility for our actions and rise above circumstances to achieve results.
- **Grit:** We are courageous, resilient, and maintain focus on our goals.

WHAT WE DO

We offer a huge range of Standard fasteners

We manufacture and supply Standard and Special Customized fasteners and associated hardware parts including bolts, Screws, Nuts, Washers, Anchors, Pins, Keys, Square Head Set Screws, and more.

We provide bespoke services

In addition to our standard products, we also offer custom fasteners to meet your specific needs. Our team of experts can work with you to design and produce fasteners that meet your unique specifications, ensuring that you get the perfect product for your application.

We employ professional engineers who have significant experience in the design and application of fasteners. We can support you and source individual drawing parts in the required size, material and surface.

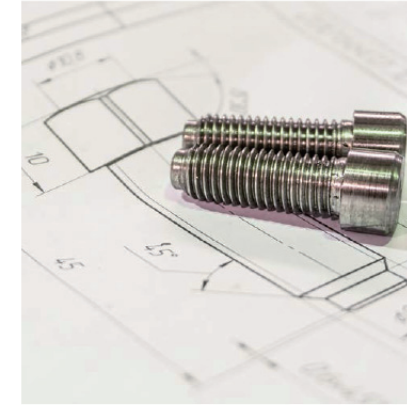

Warehousing and Logistics

We also help streamline and simplify purchasing, procurement, materials management, warehousing, maintenance and production processes. We achieve this through inventory management solutions.

We would have reliable logistics partners who can help us safely transport products to our customers' factories or warehouses.

Our logistics partners would use a variety of transportation modes, including air, sea, and ground, to ensure that products are delivered efficiently and cost-effectively.

We would also work closely with our logistics partners to monitor shipments, track delivery status, and address any issues that may arise during transit.

WE SUPPLY INDUSTRIES ALL OVER THE WORLD

including Europe, America, Southeast Asia, and the Middle East. We have won numerous awards and recognition for our high-quality products and excellent service.

BESPOKE SERVICES, TAILORED TO YOUR NEEDS

We would be able to provide customized fasteners according to our customers' requirements. We would work closely with our customers to understand their specific needs and requirements and design fasteners that meet their exact specifications.

OUR PRODUCTS

We would offer a wide range of fastener products to meet the needs of our customers. This would include, but not be limited to, bolts, nuts, screws, studs, washers, and other related products.

We would work with our customers to understand their specific requirements and provide customized solutions when necessary. Our products would be available in a variety of materials, including steel, stainless steel, brass, and aluminum, among others. We would also offer different finishes and coatings, such as zinc plating, black oxide, and hot-dip galvanizing, to meet our customers' specific needs.

If you have any specific fastener requirements or questions, please feel free to contact us, and we would be happy to discuss them with you.

Fasteners & Fixings

- Bolts
- Nuts & inserts
- Washers
- Construction & anchoring
- Fasteners hardware
- Hexagon socket screws
- Metal thread screws
- Nylon fasteners
- Petrochemical
- Rivets & lockbolts
- Security fasteners
- Self drilling screws
- Self tapping screws
- Split pins & R clips
- Stainless steel fasteners
- Structural & purlin assemblies
- Threaded rod
- Exotic alloy
- Special procured fasteners

Non standard products

- 12 point bolt
- BALL BOLT
- Big head bolt
- Bush
- Wheel bolt

BESPOKE SERVICES, TAILORED TO YOUR NEEDS

We would be able to provide customized fasteners according to our customers' requirements. We would work closely with our customers to understand their specific needs and requirements and design fasteners that meet their exact specifications.

FACILITIES & EQUIPMENT

With our technical expertise, sourcing experience and solution focused individuals, we help increase efficiencies and reliabilities for our customers.

We've developed bespoke service packages which help increase efficiencies and reliabilities. We're always on hand to support.

Cut off

This process is the process of cutting metal materials into the required length using a cutting machine.

It can be used for many different types of metals, including steel, aluminum, copper, and iron

Hot forging

The process of heating a metal material to its plastic deformation temperature and then applying pressure in a mold to change its shape is usually used to manufacture parts with high strength, wear resistance, and high temperature resistance

Cold heading

Usually used for manufacturing small metal parts such as screws, bolts, nuts, and other fasteners. This process is completed by processing metal materials into the desired shape, usually using a dedicated cold forging machine to complete this process.

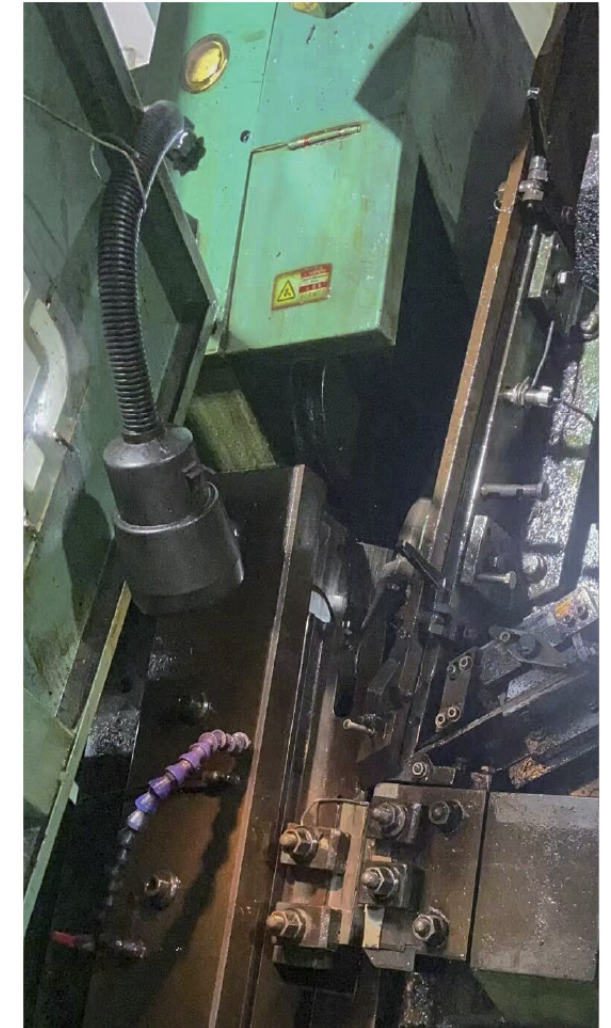

Cold heading

In this process, the metal material is processed into the desired shape, usually completed using pressure and impact.

Pressed thread

Reduce waste, time and resources with our Inventory Management solutions.

Pressed thread

We provide the necessary technical support from project design to project implementation.

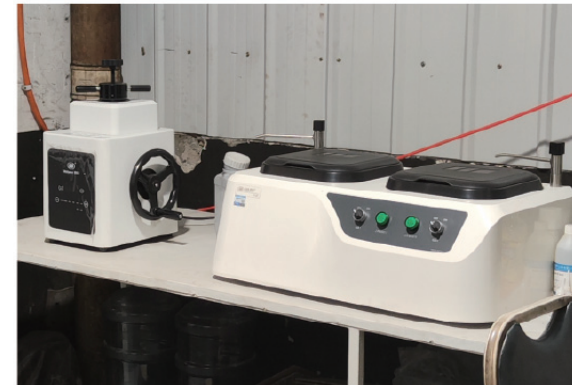

DESCRIPTION OF PRODUCTION PROCESSES & QUALITY CONTROL MEASURES

QUALITY INSPECTION EQUIPMENT

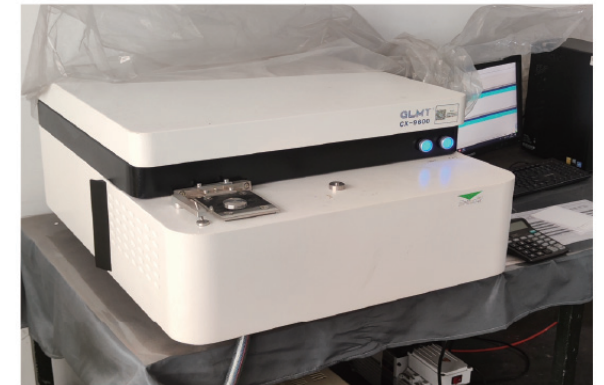

Our production processes involve strict quality control measures, from raw material inspection to final product testing. We use statistical process control techniques to ensure consistency and quality.

Testing and inspection protocols

We use various testing and inspection protocols to ensure that our products are of the highest quality. Our testing protocols include mechanical testing, chemical testing, and surface finish testing.

Metallographic inspection

Spectrograph

Tensile tester

Hardness tester

Projection detector

Salt spray test

OUR OPERATION

Our products are sold all over the world, including Europe, America, Southeast Asia, and the Middle East. We have won numerous awards and recognition for our high-quality products and excellent service.

Mainly distributing to :
North America 45.00%
Europe 35.00%
Others 20.00%

OUR HISTORY

ZhenKun Fasteners was born in a small village near Ningbo, and committed to provide small bolts for local factory & construction project.

In these five years, we called them "Golden period", we earned our "First Golden", then we completed our cold forge plant and got ready for building the hot forge production line. We were growing up gradually in local market & starting foreign market at that time.

For better future, we moved our factory to port area in NingBo and focused on more developing our plants to meet diverse requirements from market around the world. At this time, we upgraded our cold forge workmanship and available to face & deal with complex bolts & nuts. What is more, hot forge workmanship was established to make large bolts & nuts by ourselves

We recognized that good equipment was not enough, we also need more talents for quality improvement ! So the group upgrade is our year's topic. And then, we invited experts to be our production managers in hot forge & cold forge plant ! In addition, we renewed our QC Team & RD Team for better group optimization.

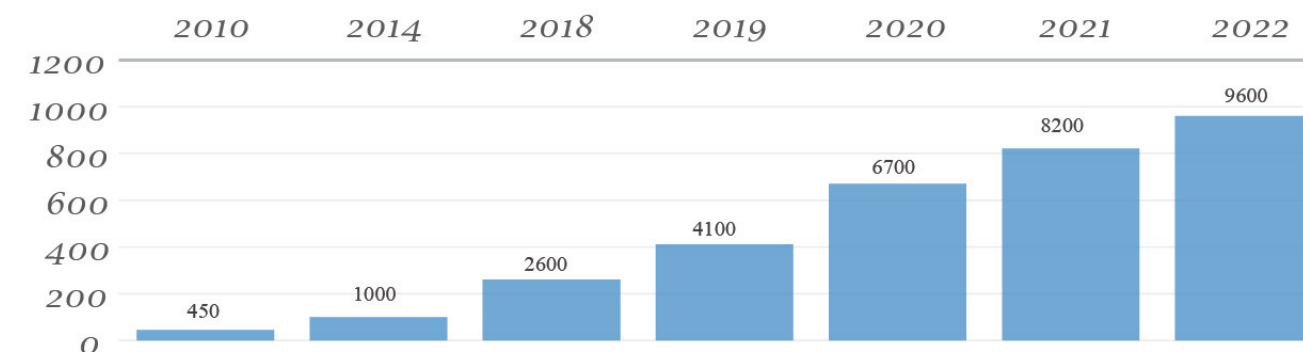

Not only the national market, Winson determined to grow more international business. Then we bought the office in NingBo CBD & established over 20 people group especially for export affairs. Since then, our export amount raised rapidly from \$200M to \$800M with in these 3 years.

In order to develop more hardware products, we became a shareholder with local aluminum factory for brackets lines. We annual amount is increasing rapidly, and plan to build a whole distribution system for building convenient one-step service & logistics for our clients !

OUR TEAM

Company Culture

At our company, we prioritize a positive and inclusive culture that values teamwork, communication, and innovation.

Our values are centered around accountability, integrity, and respect for both our customers and employees. We believe that by fostering an environment of trust and collaboration, we can drive creativity and excellence.

Employee development and training programs

We invest in our employees by providing ongoing training and development programs to help them grow professionally and personally. Our employees have access to workshops, seminars, and online resources that help them build their skills, knowledge, and leadership abilities.

Community involvement and corporate social responsibility

We are committed to being responsible corporate citizens and making a positive impact in the communities we serve. We support a variety of local charities and organizations through donations, volunteerism, and sponsorships. Our company also strives to be environmentally conscious and implements sustainable practices in our operations.

United States

On-time Shipment: **Very satisfied** (5 stars)

anchor bolt

★★★★★

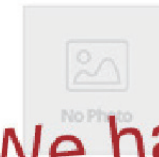

As our construction on the island is based on concrete mainly, the projects here use generally their Anchors for the installations of the renewable energy system at the roofs as they must resist the hurricane (typhoon) that we face every season. So, this item is one of the best to use on the project to anchor the racks systems that holds the solar panels on the roofs at the island and it can resist the winds up to 160 mph winds so; their item is the best choice for our customers installers and our walk-in customers on their installations. I think that would be my review. They it to us at good price that benefit our installers and resellers and our store so is an excellent business.

bolt nut washer

★★★★★

This is my first experience importing overseas And I could not be more pleased With my experience so far. My sales rep is Hester Jin and she is F*cking awesome!!! 🤔

she knows her product very well and has been thorough throughout the entire process. This is a company you can trust. I have personally vetted them outside of the Alibaba net work and everyone has wonderful things to say about them.

I can't speak for any of the other employees at this company but Hester Jin is the best sales rep I've ever dealt with anywhere. She takes her time to get to know you as a person and find out your needs. quality really is their culture at Sokun!!!

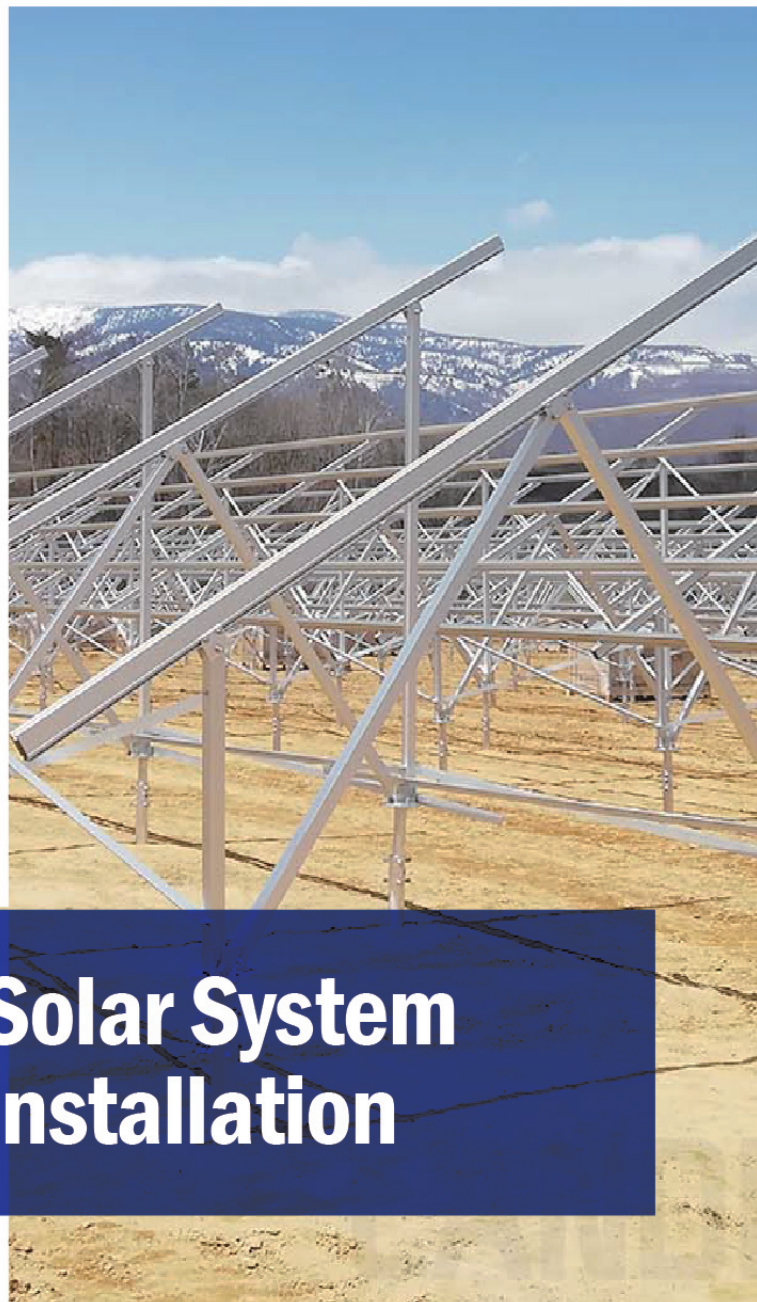

I can't wait to do more business with this company

If everyone of your employees it's like Hester than your company will have a very very good fortune and success in the future!

CASE STUDIES OF SATISFIED CUSTOMERS

We have been widely praised. We have a track record of delivering exceptional results and exceeding customer expectations. We have received positive feedback from our customers, who have praised us for our responsiveness, reliability, and attention to detail.

We have been widely praised.
We are willing to cooperate wholeheartedly with you!

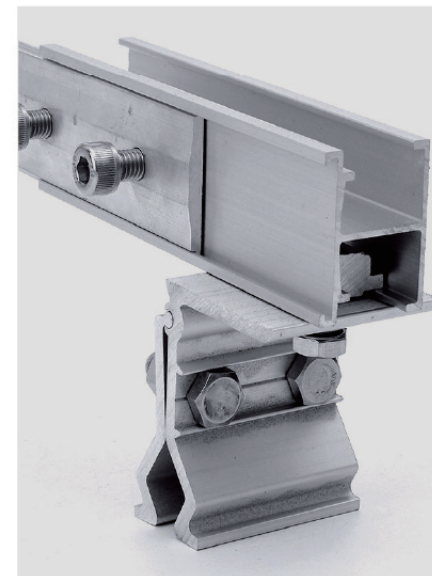

Future Outlook

Our company is committed to continued growth and success. We have a strategic plan in place to expand our product lines, enter new markets, and invest in the latest technologies and equipment. Our goal is to remain a leader in the industry and continue providing our customers with the highest quality products and services.

Emerging trends and opportunities

We are constantly monitoring industry trends and developments to identify new opportunities for growth and innovation. We are excited about the emerging trends in the industry, such as the increased demand for sustainable and environmentally-friendly products. We are also exploring new markets and partnerships to expand our reach and offer our customers even more value.
