

Xiaoqiang Technology is a company focused on R&D and production of portable facial beauty tools and hair tools OEM&ODM factory. With more than 10 years of industry experience, we are committed to providing consumers with high-quality beauty tools to help them show their confidence and beauty.

The main products include: hair curlers, hair straighteners, hair straightening brushes, skin cleaners, Hair removal machine, heated eyelash curlers, eyebrow trimmers, etc.

In order to meet market demand, the company continuously develops new beauty tools and hair tools, and provides customers with customized production services, including design and production.

As a partner, customers enjoy the following support and benefits:

Sample Experience: Offer free samples or send samples to get a better understanding of the product.

Product quality assurance: free replacement within one year, five-year warranty, and 5% spare parts provided to ensure that the product is always in the best condition.

Flexible payment methods: For high-quality customers who have cooperated, long-term cooperation payment methods can support 100% credit delivery within 30-90 days, providing customers with greater financial flexibility.

Xiaoqiang Technology is committed to providing customers with high-quality beauty tools and hair tools, as well as flexible and reliable support and services, and looks forward to working with you.

NEW PORTABLE DESIGN

Easy to take with you. helping you maintain perfect hairstyle and fresh skin at all times

Hair dryer

Features:

1. Reduce static electricity: The built-in negative ion generator can release a large number of negative ions, which are neutralized with the positive charge in the hair, effectively reducing the generation of static electricity, making the hair smooth and untamed, reducing the phenomenon of flying.
2. Hair care: Negative ions can help close the hair scales, reduce water loss, make the hair look more shiny, supple, long-term use helps to improve hair dry, split problems.
3. Accelerated drying: Although the emphasis is on hair care, modern negative ion hair dryers also pursue high efficiency, and some products provide strong wind through high-speed motors to quickly dry hair, saving time and reducing the potential damage of high temperature to hair.
4. Accurate temperature control: high-end negative ion hair dryers are usually equipped with intelligent temperature control systems, which can accurately control the temperature of the outlet, avoid overheating damage, and protect the health of the hair.

Model:DT08

Product parameter:

- Case material: Spray (UV paint) (nylon high temperature resistant material) screen printing
- Motor type: brushless motor
- Rated power :1600 (W)
- Body weight: 605g
- Temperature control: cold/hot air
- Handle folding: not folding
- Nozzle style: rotating nozzle + collecting nozzle
- Overheat protection: Yes
- Rated voltage :220 (V)
- Motor: DC motor
- Heating wire: corrugated wire
- Shell process: spraying (UV paint, rubber paint, metal paint, piano paint, pearl powder)
- Wind speed gear :3
- Additional functions: Alternating hot and cold air
- Noise :36dB(inclusive) or less
- Color: Rose red, purple, Chinese red, silver gray
- Unit weight :1kg
- Product volume :20cm * 30cm * 20cm

Color packaging and logo can be customized

Hair dryer

Features:

1. High performance motor: This type of fan has a powerful motor built in, usually using advanced electromagnetic technology and high efficiency design to produce greater wind output. The power and speed of the motor are the key factors that determine the wind strength.
2. Wind wheel design: The use of optimized wind wheel or fan design, such as cross-flow wind wheel, can effectively improve the concentration and diffusion range of wind, to achieve three-dimensional air supply, to ensure rapid indoor air circulation, improve cooling efficiency.
3. Multi-speed adjustment: Provide multi-speed wind speed adjustment function, users can adjust the wind size according to actual needs, from soft to strong, to meet the needs of different seasons and scenes.
4. Quiet technology: Although the wind is strong, but through precision machining, balance correction and the use of low noise motor, this type of fan can also maintain low working noise, suitable for the need for a quiet environment, such as offices, bedrooms and so on.

Hair removal machine

Features:

- 1.GT-2401 Hair removal devices offer a convenient and effective way to remove unwanted body hair.
- 2.One popular type is the IPL (Intense Pulsed Light) hair removal device. IPL technology targets the hair follicles with pulses of light to disrupt hair growth and achieve long-lasting results.
- 3.These devices are safe, comfortable, and can reduce hair regrowth cycles. The process is simple: clean and trim the skin, select the appropriate settings, glide the device over the skin, and apply soothing lotion afterward.
- 4.Hair removal devices save time and money by allowing users to perform treatments at home, avoiding frequent salon visits. With various designs and features like handheld and cooling technology, these devices cater to different preferences. Hair removal devices provide a modern, convenient, and efficient solution for smooth, hair-free skin.

Hair removal machine

The Intense Pulsed Light (IPL) hair removal device is a versatile tool for achieving smooth and hair-free skin. By utilizing advanced IPL technology, this device can effectively reduce hair growth and gradually diminish hair density. With its specially designed head, it is capable of capturing and removing hair follicles, leaving your skin silky and hair-free. Offering multiple energy levels, this device can be adjusted to suit various body areas and skin types, ensuring a personalized and efficient hair removal experience. Equipped with safety sensors, it ensures that the device is used under optimal conditions, preventing any potential skin damage. Say goodbye to unwanted hair with the convenience and effectiveness of the IPL hair removal device.

Hair removal machine

Features:

- 1.Precision: Laser hair removal devices target hair follicles with high precision, selectively destroying the hair without causing damage to the surrounding skin.
- 2.Permanent reduction: One of the biggest advantages of laser hair removal is the potential for long-term hair reduction. With repeated treatments, it can provide semi-permanent to permanent results.
- 3.Speed: Laser hair removal devices can treat large areas of the body relatively quickly. The laser emits pulses that cover a significant area, allowing for faster treatment times compared to traditional methods.
- 4.Safety: Modern laser hair removal devices are equipped with safety measures to protect the skin from excessive heat and minimize discomfort during the treatment. They often have built-in cooling systems to keep the skin comfortable during the procedure.
- 5.Versatility: Laser hair removal devices are suitable for various skin and hair types. They can be adjusted to accommodate different skin tones and hair colors, making the treatment accessible to a wide range of individuals.

Heated Eyelash Curlers

Features:

1. Using rapid heating technology, it can reach the ideal use temperature in a short time, quickly achieve the curling effect of eyelashes, save time, and make it more convenient for you to go out beautifully.
2. The unique heating design can make the eyelashes curl more easily and last longer, making the curling effect last longer and making the eyes look brighter.
3. Combined with gentle heat pressing technology, it avoids the problem of excessive pulling with traditional eyelash curlers, protects eyelashes from strain, and effectively reduces breakage and shedding.
4. It adopts anti-scalding design to avoid scalding the skin during use. It is safe and secure and ensures that it will not cause any harm to the skin.
5. Easy to carry and suitable for carrying around. Whether it is daily outing or traveling, it can be easily put into a cosmetic bag or carried with you, making it more convenient to use.

Model: GT-2109

Product specifications:

Size: 36*34*172mm

Material: ABS+Silicone

Suction: 70KPA, Output power: 5.0W

Battery: 3.7V lithium battery 1200mAh

Weight: 122g

Resolution: 1080P, Working hours: 3.5H

Operating system: ios Android

color: White, Resolution: 1080P

Operating system: ios Android

Accessories: 2 suction heads, 5 foams, data cable, manual

Packing information:

Outer box size: 44*30.5*42.5cm

Packing quantity: 60PCS/carton

Gross weight: 15.0kg

Product size: 17.2*3.6*3.4cm

Product weight: 110g

Gross weight: 250g

Packaged product size: 20.5*8.4*4.8cm

Weight with packaging: 250g

Visual blackhead cleaner (Visible Pore Cleaner)

Features:

1. Blackheads and acne are clearly visible, helping to clean facial skin effectively.
 2. It can help deep clean pores and reduce the formation of blackheads and acne.
 3. Provide visual feedback to make it easier for users to master usage methods and effects.
- The suction and light can be adjusted according to personal needs, suitable for different skin types and problematic skin colors.

Ultrasonic skin scrubber

Features:

1. Deep cleaning and exfoliation: Ultrasonic high-frequency vibration can soften cell tissue, completely remove aging cutin and oil that blocks pores, making the skin cleaner and refreshed.
2. Through high-frequency energy conversion of ultrasound, this product can improve local blood circulation and lymphatic return, enhance skin activity, promote pigment decomposition, fade dark spots, and at the same time enhance pore permeability, making the skin more shiny and elastic.
3. Prevent acne and whekls: Because this product can completely remove excess oil and residual makeup, and has the effect of cleaning pores, it can prevent the formation of acne and whekls, making the skin fresher and healthier.
4. Promote cell regeneration and metabolism: The high-frequency vibration of ultrasound can promote the vibration of skin cells, thereby promoting the metabolism and regeneration of tissues, making the skin younger and more energetic.
