

#### **Base**

POWER MARINE is a professional leader China 316 Stainless Steel Clamp-on Antenna Base manufacturer with high quality and reasonable price. Welcome to contact us. We are a professional 316 Stainless Steel Clamp-on Antenna Base

manufacture for more than 25 years. We can provide high quality products and competitive prices, and we can be good partners.

# 316 Stainless Steel Clamp-on Antenna Base

### **Product Introduction**

As the professional manufacturer, POWER MARINE would like to provide you 316 Stainless Steel Clamp-on Antenna Base. And we will offer you the best after-sale service and timely delivery. Buy 316 Stainless Steel Clamp-on Antenna Base, which is of high quality directly with low price. The Antenna Base meets Marine grade, at the same time it has excellent corrosion resistance. The 316 Stainless Steel Clamp-on Antenna Base provides excellent stability and the design can be easily roped in place.

# **Product Parameter (Specification)**

Product name	316 Stainless Steel Clamp-on Antenna Base		
Specification available Multiple sizes			
Standards that follow to	ISO 9001, CE, TUV, CSS, SGS.		
Samples available	Yes.		
Packing method	Bubble bag+Wooden carton		
Production lead time	10-15 days for a 20ft container, 20-25 days for a 40ft		

# Shandong Power Industry and Trade Co., Ltd.

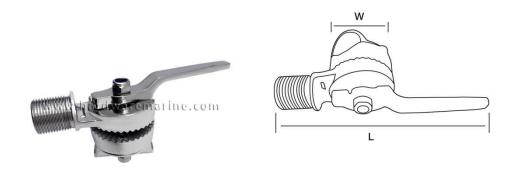

Address: Chengyang District, Qingdao, Shandong Province, China

**Tel**: +86-15865772126 +86-0532-83875707

	container.
Warranty time	Support returns and exchanges
Payment term	Т/Т
FOB loading port	Qingdao China

Code	L mm	W mm
PM8050D	80	50

# **Product Feature And Application**

The history of 316 Stainless Steel Clamp-on Antenna Base can be traced back to advances in radio communications technology and the need for reliable and versatile antenna mounting solutions. In the early days of radio communications, antennas were mounted using fixed brackets or clips, which made adjusting the position or angle of the antenna challenging. This can cause problems when trying to optimize signal reception or transmission directivity. The introduction of the 316 Stainless Steel Clamp-on Antenna Base revolutionized the way antennas are mounted on boats and other applications. The ratchet mechanism allows easy adjustment of the angle and position of the antenna without the need for additional tools or hardware. Stainless steel is the material of choice for ratchet-mounted antenna bases due to its excellent corrosion resistance, which is critical in marine environments. Harsh conditions at sea, including exposure to salt water and other corrosive elements, require the use of durable and long-lasting materials, such as stainless steel. Over the years, advances in manufacturing techniques and materials have further

improved 316 Stainless Steel Clamp-on Antenna Base. Features such as spring-loaded mechanisms, locking systems and various mounting options have been incorporated to enhance functionality and ease of use. Today, stainless steel ratchet mount antenna mounts are widely used on boats, recreational vehicles, and other applications that require reliable and adjustable antenna mounting. They provide a secure, flexible solution that allows users to optimize the performance of their radio communications by easily adjusting the position and angle of the antenna.

### **Product Details**

The 316 Stainless Steel Clamp-on Antenna Base is an antenna mounting solution that securely attaches to a pole or rail without the need for drilling or permanent fixing.

**Material:** 316 Stainless Steel Clamp-on Antenna Base is made of high-quality stainless steel. This material is resistant to corrosion, rust and other environmental factors, making it suitable for outdoor and marine applications.

**Clamp Design:** The base features a clamp or bracket mechanism that easily attaches and secures to poles, rails, or other similar surfaces. This design requires no drilling or permanent fixtures.

**Adjustable fit:** 316 Stainless Steel Clamp-on Antenna Base are often adjustable to fit different sized poles or rails. It can be tightened or loosened to fit a variety of diameters, providing a safe and stable mounting solution.

**Secure connection:** Once the clamp is tightened, it ensures the antenna base is firmly and reliably connected to the pole or rail. This helps prevent any movement or vibration during use.

**Versatility:** 316 Stainless Steel Clamp-on Antenna Base can be used in a variety of applications, including boats, RVs, rooftops, or any other situation where temporary or non-permanent installation is preferred.

**Easy to Install:** Clamp-on design allows for quick and easy installation. No complicated tools or drilling required. Simply position the clip-on antenna base, tighten the clip securely, and install the antenna.

Compatibility: These mounting bases are designed to be compatible with a

variety of antenna types and sizes. They often have standard mounting threads or brackets that allow for easy attachment of compatible antennas.

**Durability:** 316 Stainless Steel Clamp-on Antenna Base withstands harsh weather conditions, including exposure to salt water, UV rays and other environmental factors. Its stainless steel construction ensures long-lasting durability and reliability.

**PORTABLE & ADJUSTABLE POSITIONING:** Clamp-on design makes it easy to carry and reposition the antenna base when needed. This is particularly useful for temporary installations or where the antenna position needs to be adjusted.

316 Stainless Steel Clamp-on Antenna Base provide a convenient and versatile mounting solution for antennas in a variety of applications. Their ease of installation, compatibility, durability and portability make them a popular choice for users who need temporary or non-permanent antenna installations

# **Loading & Shipment**

Thanks to superior quality, we have been establishing a close & long business partner relationship with the customers from more than 30 countries, and we've gotten so many positive feedback regarding the quality.
